Dr. John E. Glenn, Ph.D.  
 Chief Nuclear Materials, Section B  
 U.S. Nuclear Regulatory Commission  
 Region 1, Materials Licensing Section  
 631 Park Avenue  
 King of Prussia, Pennsylvania 19406

Reference: Amendment to License No. 18-20568-01

Dear Dr. Glenn:

In accordance with the requirements of our NRC license, we would like to request an amendment to Condition 12. We request that it be modified to show the following:

Condition 12.

Licensed material shall be used by or under the supervision and in the physical presence of Stephen L. Tuttle, Tammy J. Grenier, W. Paul Niehoff, David W. Andrews, Donna M. St. Pierre, Russell L. Bragg, Jeffrey P. Musich, Gerald W. Wallace, Timothy B. Braun, and William M. Peterlein.

This change adds to our license William M. Peterlein, and deletes Sue E. Lebel and Christine Dorion, as they no longer work for our firm.

William M. Peterlein has successfully completed our radiation safety and licensing seminar as well as a field seminar in the use of the equipment which we operate. In addition, he has completed a closed-book examination.

His score is as follows:

William M. Peterlein

120 out of 140

A copy of the exam questions was forwarded with our third amendment request. They have all studied the instruction manual for the 3400B Series Surface Moisture-Density Gauge published by Troxler Laboratories and the Campbell Pacific Nuclear Model 131 MC Series. Each person also received a copy of the Nuclear Training Manual and Gauge Manual which was also included in our third amendment request.
