

AUG 07 1985

Mr. Henry G. Vickers
Regional Director
U. S. Federal Emergency Management Agency
Region I
442 J. W. McCormack Post Office and Court House
Boston, Massachusetts 02109

Dear Mr. Vickers:

We are currently revising the NRC Region I Incident Response Plan based, in part, on Federal Emergency Response Plan guidance as well as lessons learned from the Federal Field Exercise held in Florida last year. For planning purposes we need information on Federal Response Center locations. If available, we would appreciate a list of the Federal Response Center locations proposed by FEMA Region I for the nuclear power stations identified in the first enclosure to this letter.

In the event of a nuclear power reactor emergency, we will enter one of four response modes. Your Region will be informed by phone upon activation of our Incident Response Center using a pre-formed initial notification message, a copy of which is attached for your information. We understand that 617-223-4741 is manned 24 hours a day for the purpose of receiving emergency notifications. If this phone number is not current, please notify us.

We appreciate your assistance in this matter. If you have any questions, please call Mr. Terry L. Harpster of my staff on FTS 488-1203 or 215-337-5208.

Sincerely,

Original signed by
Thomas E. Murley
