Dear Doctor Glenn:

The Newton-Wellesley Hospital requests an amendment to our license, 20-02615-01, to cover a 1.0 Curie source of Gadolinium 153, from E.I. duPont, New England Nuclear Products for insertion into Lunar Corporation, (Madison, Wisconsin), DP3 Dual Photon Spine Scanner. The catalog order number is NER-430, and the NRC Registration No. (NEN) is NR-476-S-153-S. The dual photon spine scanner will be used for diagnosing bone maladies.

Harold Simon, M.D. will be the individual user. Doctor Simon is Director of the Division of Nuclear Medicine and Associate Radiologist-in-Chief. He is board certified in Radiology (1962) with a Nuclear Medicine Medallion by the American Board of Radiology. He is board certified in Nuclear Medicine (1974) by the American Board of Nuclear Medicine. He is the individual user on our license (since 1967) for Groups I, II, III, IV, and V, in vitro studies, ^{133}Xe and ^{125}I and ^{153}Gd (Gulf Nuclear) for diagnosing bone maladies.

Mrs. Egilda Witherell, Radiological Physicist (American Board of Radiology certified) and Radiation Safety Officer will conduct wipe tests of the ^{153}Gd source semi-annually and perform an annual radiation survey.

Enclosed is the \$120.00 fee required to process the amendment.

Sincerely,

Barry Spero
