Mr. R. L. Kirk
Acting Director
Division of Licensing and Regulation
U.S. A.E.C.
Washington 25, D.C.

Reference: L&R:IB:WSC
Docket No. 27-7

Dear Mr. Kirk:

We do not store zirconium scrap, sodium or other potentially explosive chemicals with our radioactive waste, indeed we have none of these on hand as far as we know.

It is always possible, however, for some of these materials to be contained in radioactive waste, even though we ask the customer to accurately define the waste content.

Please advise of any practical procedures that you may have to prevent inadvertant receipt of hazardous industrial materials in radioactive waste shipments.

Very truly yours,

J. D. Vaden
