Office of Inspection and Enforcement
Attn: Dr. T. E. Murley
Regional Administrator
US Nuclear Regulatory Commission
Region I
631 Park Avenue
King of Prussia, PA 19406

Dear Dr. Murley:

Three Mile Island Nuclear Station, Unit 2 (TMI-2)
Operating License No. DPR-73
Docket No. 50-320
Inspection Report 84-04

Inspection Report 84-04 involved a special assessment of the GPU Nuclear program for maintaining occupational exposure As Low As Reasonably Achievable (ALARA) at TMI-2. As a result of this assessment, the NRC identified several perceived weaknesses in ALARA implementation. On January 23, 1985, GPU Nuclear forwarded to the NRC letter 4410-85-L-0021 (same subject) which discussed GPU Nuclear's plans for correcting the perceived weaknesses. This letter is being forwarded to modify and correct one (1) of these earlier responses.

In response to perceived weakness 50-320/84-04-04, GPU Nuclear stated that an ALARA training program for personnel would commence six (6) months from the implementation date of the ALARA Program Plan. This statement was inaccurate. In actuality, the response should have stated that the training program would commence six (6) months after implementation of the TMI-2 ALARA Program Procedure, 4000-ADM-4010.01. This procedure was implemented on July 1, 1985; thus GPU Nuclear intends to start the training program by January 2, 1986.
