Subject: Sample Results from 170 W. Providencia

Frank, I have reviewed the State laboratory analysis of the concrete sample from the Isotopes Specialties main building at 170 W. Providencia Street and noted that I have previously sent you (via E-mail) not the actual concentration results but the MDA's for their system.

These are the results for the concrete sample were took from one of the hot spots.

The results of this sample indicate the following radioisotopes were present and in the following concentrations (pCi/g):

<u>Isotope</u>	<u>Sample Concentration</u>	<u>NRC Limit</u>	
Cs-137	14.56	15	
Ra-226	30.1		5
Th-230	3,507	10	
Th-232/Th-228	317.2	10	
U-238/Th-234
