The Jackson Laboratory  
Bar Harbor, ME 04609

24 February 1984

Dr. John E. Glenn  
License Office, Region I  
USNRC  
631 Park Ave.  
King of Prussia, PA 19406

Dear Sir:

Re NRC license no. 18-02774-01

The above Type A Broad scope byproduct license terminates 31 March 1984. This letter is to notify the NRC that the Jackson Laboratory will file a complete renewal application rather than elect the alternative of a license up-date. The completed application will be mailed to the Region I office on or before 15 March 1984. The additional time requested will provide for thorough institutional review of the substantive changes specified in the license renewal application.

Communication associated with this request and license renewal should be directed to me. Thank you.

Sincerely,

*Wesley G. Beamer*
