

AUG 02 1985

Docket No. 50-352

Philadelphia Electric Company  
ATTN: Mr. S. L. Daltroff  
Vice President, Electric Production  
2301 Market Street  
Philadelphia, PA 19101

Gentlemen:

Subject: Inspection No. 50-352/85-22

This refers to the special physical security inspection conducted by Mr. R. J. Bailey of this office on April 17 - 19, and 22, 1985 at the Limerick Generating Station, Limerick, Pennsylvania of activities authorized by NRC License No. NPF-27, to the discussions of our findings held by Mr. Bailey with Mr. Franz and other members of the Philadelphia Electric Company staff at the conclusion of the inspection, and to subsequent telephone discussions between Mr. Bailey and Mr. J. Basilio on May 10 and 22, 1985, and Mr. J. Larkin on June 24, 1985. This also acknowledges your letter of April 30, 1985, which confirmed commitments made to Mr. Bailey during discussions at the conclusion of the inspection and to your letter of April 3, 1985, which advised us of planned improvements in implementation of the Limerick Security Program.

The purpose of this inspection was to determine the state of the training of security force personnel at the Limerick Generating Station and their ability to carry out their assigned duties. The findings of the inspection are described in the NRC Region I Inspection Report which is enclosed with this letter. The inspection consisted of monitoring reexaminations of a statistically selected sample of security personnel in qualification and requalification tasks; observation of examination administration; interviews of security personnel; reviews and evaluations of examination results; and reviews of security event reports.

Within the scope of this inspection, no violations were observed. The inspectors determined that, with a 95% confidence level, security force personnel are sufficiently knowledgeable to carry out their assigned duties. While statistically unacceptable failure rates on certain examinations were observed for a specific group in the security organization, observations of on-the-job performance of this group by the inspectors determined that the apparent training deficiencies did not constitute a significant weakness in your security program. Remedial training was promptly initiated by your staff for those members of the security organization who failed any test and each such individual was subsequently requalified.

In accordance with 10 CFR 2.790(a), a copy of this letter and the enclosure will be placed in the NRC Public Document Room.
