Attention: Mr. G. G. Zech
Chief Vendor Program Branch
Mailstop EW 359

Dear Mr. Zech:

Enclosed is the latest revision of chemically cross-linked Firewall III, report QR-5804, dated October 24, 1985.

This revision addresses on page 16 the deviation from Test Plan 4804 where post LOCA testing was performed on the three previously energized conductors of the seven conductor cable, rather than on all seven conductors.

Also enclosed is a copy of irradiation cross-linked Firewall III, report QR-5805, dated October 8, 1985.

Very truly yours,

THE ROCKBESTOS COMPANY
