Dear Dr. Grace:

BELLEFONTE NUCLEAR PLANT UNITS 1 AND 2 - BELLEFONTE DESIGN CRITERIA NOT
UP-TO-DATE - BLRD-50-438/83-28, BLRD-50-439/83-23 - THIRD INTERIM REPORT

The subject deficiency was initially reported to NRC-OIE Inspector Linda Watson on April 5, 1983 in accordance with 10 CFR 50.55(e) as NCR BLN NEB 8301. This was followed by our interim reports dated May 2 and November 22, 1983. Below is our third interim report. We expect to submit our next report on or about March 18, 1986.

Interim Progress

All safety-related TVA design criteria documents have been reviewed and have been revised (where necessary) to ensure that outstanding design input memorandums (DIMs) have been incorporated into the design criteria. (This was done for all design criteria where the oldest DIM was more than one year old or the design criteria had more than five outstanding DIMs).

Additionally, all non-safety-related design criteria have been reviewed and those that are out-of-date will be revised to incorporate all outstanding DIMs.

If you have any questions, please get in touch with R. H. Shell at FTS 858-2688.

Very truly yours,

TENNESSEE VALLEY AUTHORITY

J. W. Hufham, Manager
Licensing and Risk Protection
