

October 20, 1978

Radioisotopes Licensing Branch  
Division of Fuel Cycle and Material Safety  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Gentlemen:

Enclosed is an application for renewal of our USNRC License No. 04-01100-01G that expires on December 31, 1978. Also enclosed is the renewal fee of \$110.00 for Category 3.L. as listed in Part 170. This is the category that was used to determine our fee under the previous fee schedule.

In our application, we have deleted from Item 7 several models that are obsolete. Items 8 through 15 are covered by our California Radioactive Material License No. 0637-70 which authorizes the possession of radioactive material and production of the devices listed in Item 7. Since it is also applicable to our USNRC License, we have included in Items 10 and 11, information regarding the instrument that we use to leak test representative samples of our products prior to distribution.

For reference, we are also enclosing two complete sets of our California Radioactive Material License renewal application dated July 27, 1978.

Applicant	Nuclear Products
Check No.	7699
Amount/Fee Category	\$110.34
Type of Fee	Renewal
Date Check Recd.	OCT 25 1978
