DEPARTMENT FOR HEALTH SERVICES

J. Nelson Grace, Ph.D.
Regional Administrator, Region II
U.S. Nuclear Regulatory Commission
101 Marietta Street, N.W.
Atlanta, GA 30323

Dear Dr. Grace:

I would like to express my appreciation specifically to Mr. Richard Woodruff of your staff for the thorough and professional manner in which the Kentucky Radiation Control Program was reviewed. The fact that several regulations had not been amended in some time to assure compatibility with the U.S. Nuclear Regulatory Commission certainly came as no surprise. They are currently in the process of being updated and this will be addressed in a separate letter from Secretary Austin.

Specifically, my comments are directed to standard license "use" conditions which is a Category II Indicator. I offer no excuses as this was an oversight on my part. During a reprinting of our licensing document, the standard "use location" condition was omitted. This has currently been corrected and an in-house memorandum has been prepared which fully outlines when to use each standard condition.

As I stated earlier, I certainly appreciate this error being brought to our attention. Should you need additional information or clarification, please feel free to contact me.

Sincerely,

Donald R. Hughes, Supervisor
Radiation Control
Radiation & Product Safety Branch
