MEMORANDUM FOR:

Leo B. Higginbotham, Chief
Low Level Waste and Uranium Recovery Projects Branch
Division of Waste Management

FROM:

Harry J. Pettengill, Chief
Licensing Branch 2
Uranium Recovery Field Office, Region IV

SUBJECT:

STANDARD REVIEW PLAN FOR RAP DOCUMENTS - GEOTECHNICAL
STABILITY SECTION

We have completed our review of the subject SRP. We find that the document provides an acceptable overview of review areas and data requirements. We note, however, that geologic and seismotectonic sections of the SRP were not included in the draft SRP transmitted to us. We provided comments on an SRP covering geologic and seismologic reviews by memorandum dated July 10, 1985. It is not clear to us how the two SRPs will be coordinated for consistency. Perhaps the SRP on geologic and seismologic reviews should simply be referenced in the SRP on geotechnical stability. In any case, we would appreciate the opportunity to review the complete version of the subject SRP before it is finalized.
