Mr. Earl Wright
U.S. Nuclear Regulatory Commission
Division of Materials and Fuel
Cycle Facility Licensing
Washington, D.C. 20555

Dear Mr. Wright:

We would like to submit this letter as a request for an amendment, to our current material license.

As discussed in our telephone conversation, we will be ceasing operation of our test facilities in Waltham, MA, and therefore will have no requirements to possess radioactive material as listed under Item 6 of our license. We will still be maintaining a service organization for our customers in the field utilizing our current license to perform service and installation as listed in Item 9A&B. Also under this Item, we would like to have listed our other proposed amendment which we have previously discussed under this provision Item 9 as well; reference control number 85270. The other items which we feel require change on our license are Item 10, Conditions, with reference to the licensee address stated in Item 2 (licensee). Also, Item 14, Conditions; remove the portion specifying the licensee address under Item 2. ✓

Sincerely,

James R. Gibson
