Director of Nuclear Reactor Regulation
Attention: Mr. John A. Zwolinski, Chief
Operating Reactors Branch No. 5
Division of Licensing
Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Zwolinski:

Reference: Fermi 1
NRC Docket No. 50-16
NRC License No. DPR-9

Subject: Relocation of Fermi 1 Alarms
to Fermi 2 Control Room

Enrico Fermi 1 Decommissioned Atomic Power Plant Technical Specifications require monitoring for water intrusion and low primary system cover gas pressure. These alarms have been relocated to panel H11P811 in the Fermi 2 main Control Room. This facility is continuously manned under the requirements of NRC License Number NPF-43 (Docket No. 50-341). Relocation of these alarms eliminates the need to man the Fermi 1 Control Room.

If you have any questions on this matter, please contact Mr. R. L. Woolley on (313) 586-4211.

Sincerely,

cc: Mr. P. M. Byron
Mr. P. B. Erickson
Mr. M. D. Lynch
