Subject: Isotope Specialties Sea Disposal License -Reply

We have not yet formally heard back from the State on this.

Frank,

I'm sending you a copy of the file for Docket 27-7, the sea disposal license for Isotopes Specialties, in case it contains material that you don't have. I presume that you can give it to California if they've accepted jurisdiction. Have we heard anything definite from California about the two Burbank sites? Is the mill back with us?
