Office of Nuclear Reactor Regulation
Attn: John F. Stolz, Chief
Operating Reactors Branch No. 4
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Stolz:

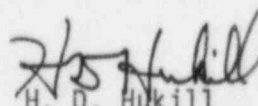

Three Mile Island Nuclear Station Unit 1 (TMI-1)
Operating License No. DPR-50
Docket No. 50-289
Listing of NRC/GPU Nuclear Activities

The Systematic Assessment of License Performance (SALP) identified a need to improve communications in terms of statusing active issues.

Several meetings and discussions have resulted in the development of a common list of regulatory activities involving GPUN submittals and associated NRR reviews. This list will be used on a continuing basis as a tool to facilitate communications and understanding.

The schedule was developed with the understanding that it does not necessarily represent GPUN or NRC commitments, therefore it does not alter or replace previous commitment dates. The attached list incorporates comments from the September 25, 1985 discussion with you and your staff. This effort has already been beneficial and with periodic update discussions, the objective of the SALP will be satisfied.

Sincerely,

H. D. Hukill
Director, TMI-1
