Gentlemen:

Subject: Inspection Report No. 50-423/85-56

On September 30 - October 4, 1985, a routine inspection was performed by Mr. J. R. White and Ms. J. A. Cioffi of our office for the purpose of reviewing the preoperational status of Millstone Nuclear Generating Station, Unit 3, with respect to areas affecting solid radioactive waste and the status of your implementation of the task items identified in NUREG-0737. Additional effort was expended in determining your actions with respect to IE bulletins and circulars and previously identified concerns. An inspection report detailing these findings is attached.

Within the scope of this inspection, no violations of NRC requirements were identified, however, several areas requiring followup effort were noted. These areas will be re-examined in subsequent inspections of your activities.

No reply to this letter is required. Your cooperation with us in this matter is appreciated.

Sincerely,
