Meloy Laboratories, Inc.
ATTN: Mr. William J. Watson
Vice President
6715 Electronic Drive
Springfield, VA 22151

Gentlemen:

SUBJECT: REPORT NO. 45-13733-01/85-01

On July 10, 1985, NRC conducted an inspection of activities authorized by NRC License No. 45-13733-01. At the conclusion of the inspection, the findings were discussed with Mr. William J. Watson.

The inspection was an examination of activities conducted under your license with respect to radiation safety and compliance with NRC regulations and the conditions of your license. It included selective examinations of procedures and representative records, interviews with personnel, and direct observations by the inspector.

The inspection findings indicate that certain activities violated NRC requirements. The violations, references to pertinent requirements, and elements to be included in your response are presented in the enclosed Notice of Violation. The first violation described in the enclosed Notice is similar to a violation contained in a Notice of Violation sent to you with our letter dated July 15, 1982. Since "similar violations", as described in the NRC Enforcement Policy, are of significant concern to the NRC, in your response please give particular attention to the identification and remedy of the root cause of the violation so that its recurrence may be precluded.

In accordance with 10 CFR 2.790(a), a copy of this letter, its enclosure, and your reply will be placed in NRC's Public Document Room upon completion of our evaluation of the reply. If you wish to withhold information contained therein, please notify this office by telephone and include a written application to withhold information in your response. Such application must be consistent with the requirements of 2.790(b)(1).

The responses directed by this letter and the enclosure are not subject to the clearance procedures of the Office of Management and Budget issued under the Paperwork Reduction Act of 1980, PL 96-511.
