NUCLEAR

July 24, 1973

Mr. F. E. Kruesi, Director
Directorate of Regulatory Operations
U. S. Atomic Energy Commission
Washington, D. C. 20545

Reference: USAEC License
No. 24-04206-01

Gentlemen:

The units reported in our July 20, 1973, letter regarding the urinary concentration of Tritium for a chemist working in our Tritium laboratory were incorrect. The correct urinary concentrations are 420 microcuries per liter on July 14, and 35 microcuries per liter on July 20. The highest measured value was 182 microcuries per liter of urine on July 16, 1973.

Please substitute the attached corrected letter dated July 20, 1973 and return the original letter dated July 20, 1973.

Sincerely yours,

MALLINCKRODT NUCLEAR
MALLINCKRODT CHEMICAL WORKS

Donald W. Soldan
Chief, Radiological
Protection Officer
