

UNION ELECTRIC COMPANY

1901 Gratiot Street, St. Louis

August 12, 1985

Donald F. Schnell
Vice President

Mr. Harold R. Denton, Director
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Denton:

ULNRC-1154

DOCKET NUMBER 50-483
CALLAWAY PLANT, UNIT 1
REVISIONS TO TECHNICAL SPECIFICATION FIGURE 6.2-2

Union Electric Company is transmitting three (3) original and forty (40) conformed copies of an application for Amendment to Facility Operating License No. NPF-30 for the Callaway Plant, Unit 1.

This application requests that the Callaway Technical Specification Figure 6.2-2 be revised to reflect an organizational title change to Superintendent, Radwaste from Supervisor, Radwaste. The title change does not involve a change in reporting relationships, job responsibilities, or minimum qualification requirements.

The organizational title change has been implemented and will be incorporated into the next revision of the Callaway FSAR.

Attachment 1 to this letter describes the enclosures transmitted herewith.

Enclosed is a check for the \$150.00 application fee as requested by 10CFR170.21.

Very truly yours,

for Robert F. Schnell
Donald F. Schnell

ATTACHMENT 1

Enclosure	A	Safety Evaluation
Enclosure	B	Significant Hazards Consideration
Enclosure	C	Marked Figures and Section

SAFETY EVALUATION

This amendment request revises the Technical Specification Figure 6.2-2 to show an organizational title change from the Supervisor, Radwaste to the Superintendent, Radwaste. This change does not alter reporting relationships to the Assistant Manager, Technical Services nor does it represent a change in the position responsibilities or the position minimum qualifications.

Pursuant to the information above, the minor revision to Technical Specification Figure 6.2-2 does not adversely affect or endanger the health or safety of the general public, and does not involve an unreviewed safety question.

SIGNIFICANT HAZARDS CONSIDERATION

This amendment request is to revise the Technical Specification Figure 6.2-2 to show an organization title change from the Supervisor, Radwaste to the Superintendent, Radwaste. This change does not alter the reporting relationship to the Assistant Manager, Technical Services nor does it represent a change in the position responsibilities or the position minimum qualifications.

The Commission has provided guidance concerning the application of the standards in 10 CFR 50.92 by providing certain examples (48 FR 14870). One of the examples of actions involving no significant hazards consideration relates to a purely administrative change to Technical Specifications. Since the Radwaste Department program remains unchanged, this request involves a minor revision to a previously submitted and approved Operations Radwaste organization.

This amendment request does not involve a significant increase in the probability or consequence of an accident or other adverse condition over previous evaluations; or create the possibility of a new or different kind of accident or condition over previous evaluations; or involve a significant reduction in a margin of safety. Based on this information, the requested license amendment does not present a significant hazard.
