

9/11/83

Mr. Leslie E. Laird, District Chief  
U.S. Geological Survey  
Water Resources Division  
1201 Pacific Avenue - Suite 600  
Tacoma, Washington 98402

Dear Mr. Laird:

Subject: Potential Mudflows at Trojan Nuclear Plant From Assumed  
Failure of Spirit Lake Blockage

As agreed during our telephone conversation of last Friday, September 9, enclosed is a copy of Portland General Electric's (PGE) latest submittal to NRC. This submittal responds to questions resulting from our review of their July 1, 1983 submittal, a copy of which I previously sent you. Also enclosed is a copy of their consultant's final report. A decision about a meeting with PGE will be made after review of this submittal. We will be in contact with you shortly regarding our plans.

Sincerely,

Ronald L. Ballard, Chief  
Environmental & Hydrologic  
Engineering Branch  
Division of Engineering

Enclosures:  
As stated
