Nuclear Consultants Division  
Box 6172, Lambert Field  
St. Louis, Missouri 63145

Attention: Mr. Donald W. Selden, Manager  
Health Physics Department

Gentlemen:

Thank you for your letter of November 14, 1966, with enclosures, informing us of the exposure of several of your employees to iodine 131.

Your letter suggests that other employees may have body burdens of iodine 131 in excess of 0.14 microcuries. As explained in our letter of March 16, 1966, we are concerned with exposures of individuals to iodine 131 irrespective of the mode of exposure. Please send us the exposure data of all persons who were found to have more than 0.14 microcuries of iodine 131 in their thyroids.

Very truly yours,
