onlyDr. Willard B. Brown, Chief
Fuel Facility Safeguards
Licensing Branch
Division of Safeguards, NMSS
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555Subject: Docket 70-734: SNM-696; Category I Shutdown Facility Plan,
10 CFR 70.32 Proposed Change.

Dear Dr. Brown:

Enclosed herewith are proposed changes to the subject plan. These changes have been reviewed by members of the GA staff and it is concluded that they qualify as 10 CFR 70.32(e) modifications which do not decrease the effectiveness of the plan.

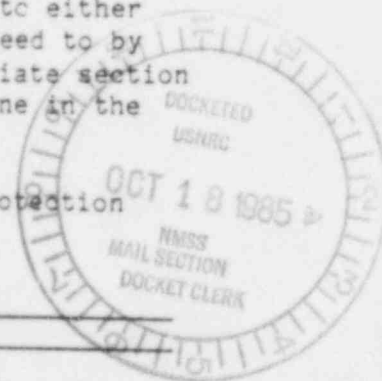

We are submitting these changes to you rather than the normal processing through Region V, since the subject plan continues under review by members of your staff.

Two of the changes involve IRS figures which were originally submitted with incorrect titles. The remaining changes have been made to either clarify certain commitments or to assure that commitments agreed to by our respective staffs have been incorporated into the appropriate section of the plan. These changes have been indicated by a ruled line in the margin.

Please make the following changes to the Shutdown Physical Protection Plan:
