

U. S. NUCLEAR REGULATORY COMMISSION

Agency Information Collection Activities: Submission for OMB Review; Comment Request

AGENCY: U. S. Nuclear Regulatory Commission (NRC)

ACTION: Notice of the OMB review of information collection and solicitation of public comment.

SUMMARY: The NRC has recently submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35). The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

1. Type of submission, new, revision, or extension: Revision
2. The title of the information collection: Application for License to Export Nuclear Equipment and Material
3. The form number if applicable: NRC Form 7

BAF-4A
x CAR-8

DF03/1

4. How often the collection is required: On occasion; for each separate request for a specific export license and for exports of incidental radioactive material using existing general licenses.
5. Who will be required or asked to report: Any person in the U.S. who wishes to export: (a) nuclear material and equipment subject to the requirements of a specific license; (b) radioactive waste subject to the requirements of a specific license; and (c) incidental radioactive material that is a contaminant of shipments of more than 100 kilograms of non-waste material using existing NRC general licenses.
6. An estimate of the number of responses: 63
7. The estimated number of annual respondents: 63
8. An estimate of the total number of hours needed annually to complete the requirement or request: 150 hours (2.4 hours per response)
9. An indication of whether Section 3507(d), Pub. L. 104-13 applies: Not applicable.
10. Abstract: Any person in the U.S. wishing to export nuclear material and equipment requiring a specific authorization or

radioactive waste requiring a specific authorization ordinarily should file an application for a license on NRC Form 7, except that certain submittals should be filed by letter. The application will be reviewed by the NRC and by the Executive Branch, and if applicable statutory, regulatory, and policy considerations are satisfied, the NRC will issue a license authorizing the export.

A completed NRC Form 7 must also be filed by any person in the U.S. wishing to use existing NRC general licenses for the export of incidental radioactive material before the export takes place (if the total amount of the shipment containing the incidental radioactive material exceeds 100 kilograms). The form is reviewed by the NRC to ensure that the NRC is informed before the fact of these kinds of shipments and to allow NRC to inform other interested parties, as appropriate, including import control authorities in interested foreign countries.

A copy of the submittal may be viewed free of charge at the NRC Public Document Room, 2120 L Street, NW (Lower Level), Washington, DC. Members of the public who are in the Washington, DC, area can access the submittal via modem on the Public Document Room Bulletin Board (NRC's Advanced Copy Document Library) NRC subsystem at FedWorld, 703-321-3339. Members of the public who are located outside of the Washington, DC, area can dial FedWorld, 1-800-303-9672, or use the FedWorld Internet address: fedworld.gov (Telnet). The document will be available on the bulletin board for 30 days after the

signature date of this notice. If assistance is needed in accessing the document, please contact the FedWorld help desk at 703-487-4608. Additional assistance in locating the document is available from the NRC Public Document Room, nationally at 1-800-397-4209, or within the Washington, DC, area at 202-634-3273.

Comments and questions should be directed to the OMB reviewer by (insert date 30 days after publication in the Federal Register):

Edward Michlovich
Office of Information and Regulatory Affairs (3150-0027)
NEOB-10202
Office of Management and Budget
Washington, DC 20503

Comments can also be submitted by telephone at (202) 395-3084.

The NRC Clearance Officer is Brenda Jo. Shelton, (301) 415-7233.

Dated at Rockville, Maryland, this *24th* day of *January* 1997.

19. Certification for Paperwork Reduction Act Submissions

On behalf of this Federal agency, I certify that the collection of information encompassed by this request complies with 5 CFR 1320.9.

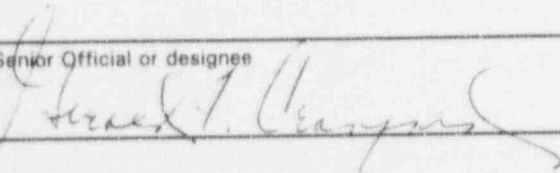

NOTE: The text of 5 CFR 1320.9, and the related provisions of 5 CFR 1320.8(b)(3), appear at the end of the instructions. *The certification is to be made with reference to those regulatory provisions as set forth in the instructions.*

The following is a summary of the topics, regarding the proposed collection of information, that the certification covers:

- (a) It is necessary for the proper performance of agency functions;
- (b) It avoids unnecessary duplication;
- (c) It reduces burden on small entities;
- (d) It uses plain, coherent, and unambiguous terminology that is understandable to respondents;
- (e) Its implementation will be consistent and compatible with current reporting and recordkeeping practices;
- (f) It indicates the retention periods for recordkeeping requirements;
- (g) It informs respondents of the information called for under 5 CFR 1320.8(b)(3):
 - (i) Why the information is being collected;
 - (ii) Use of information;
 - (iii) Burden estimate;
 - (iv) Nature of response (voluntary, required for a benefit, or mandatory);
 - (v) Nature and extent of confidentiality; and
 - (vi) Need to display currently valid OMB control number;
- (h) It was developed by an office that has planned and allocated resources for the efficient and effective management and use of the information to be collected (see note in Item 19 of the instructions).
- (i) It uses effective and efficient statistical survey methodology; and
- (j) It makes appropriate use of information technology.

If you are unable to certify compliance with any of these provisions, identify the item below and explain the reason in Item 18 of the Supporting Statement.

OMB SUPPORTING STATEMENT FOR
NRC FORM 7, APPLICATION FOR LICENSE TO
EXPORT NUCLEAR MATERIAL AND EQUIPMENT
(3150-0027)
REVISION TO EXTENSION REQUEST

DESCRIPTION OF THE INFORMATION COLLECTION

The Nuclear Regulatory Commission (NRC), under the Atomic Energy Act of 1954, as amended, and Title II of the Energy Reorganization Act of 1974, as amended, has authority for exercising export controls over nuclear equipment and material. All persons who wish to export or import nuclear equipment and material as specified in 10 CFR 110 Sections 110.8, 110.9, and 110.9a must provide certain information collection elements to enable the NRC and the Executive Branch to make required export and import licensing determinations to ensure compliance with NRC regulations and to satisfy statutory requirements of the Atomic Energy Act of 1954, as amended.

Section 110.19(b), Types of Licenses, requires that a person using a general license under this part as authority to export incidental radioactive material that is contained in or a contaminant of a shipment that exceeds 100 kilograms in total weight shall file a completed NRC Form 7 before export takes place.

Section 110.20(a)(1), General License Information, requires that a person using a general license as authority to export incidental radioactive material contained in or a contaminant of a shipment exceeding 100 kilograms in total weight file an NRC Form 7 before the export takes place.

Section 110.21(e), General License for the Export of Special Nuclear Material, requires that a person using the general licenses in paragraphs (a), (b), or (c) as authority to export special nuclear material as incidental radioactive material contained in or a contaminant of a shipment exceeding 100 kilograms in total weight shall file a completed NRC Form 7 before the export takes place.

Section 110.22(f), General License for the Export of Source Material, requires that a person using the general licenses in paragraphs (a), (b), (c) or (d) as authority to export source material as incidental radioactive material contained in or a contaminant of a shipment exceeding 100 kilograms in total weight shall file an NRC Form 7 before the export takes place.

Section 110.23(e), General License for the Export of Byproduct Material, requires that a person using the general licenses in paragraphs (a), (b), and (c) as authority to export byproduct material as incidental radioactive material contained in or a contaminant of a shipment exceeding 100 kilograms in total weight shall file a completed NRC Form 7 before the export takes place.

Section 110.31, Application for a Specific License (Original shipments, Amendments, Renewals), requires that a person file an application for a license to export or import nuclear material or equipment requiring specific authorization, with appropriate fee in accordance with 10 CFR 170. Applications should be filed on NRC Form 7, except that applications for import of material, export of a facility, license renewal or license amendment should be filed by letter (OMB has approved this collection under 3150-0036). A person is required to provide the information specified in § 110.32 and the NRC may require more information. An application shall be withdrawn when not needed.

Section 110.32, Information Required in an Application for a Specific License/NRC Form 7, states that the following information is required on an application: name and address of applicant, supplier, intermediate and ultimate consignees; country of origin of equipment and material; shipment dates; and description of export and end use. Applications for import and export of radioactive waste and for export of incidental radioactive material require the volume, classification, physical and chemical characteristics, route of transit, and ultimate disposition.

A. JUSTIFICATION

1. Need for and Practical Utility of the Collection of Information

The NRC Form 7 is a multipurpose export license application designed to allow persons to provide the minimum amount of information necessary for NRC to fulfill the statutory and regulatory requirements governing exports of nuclear material and nuclear equipment under the NRC's authority. The form is clear, concise, easy to understand, and simple to prepare.

2. Agency Use of Information

The Commission and the Executive Branch review the license applications submitted on NRC Form 7 to make required export licensing determinations to ensure compliance with regulations. If applicable statutory, regulatory, and policy considerations are satisfied, the NRC will issue a license authorizing the export.

The Commission reviews exports of incidental radioactive material filed on NRC Form 7 before the export takes place to help assure that the NRC is informed before the fact of these kinds of shipments and allows us to inform other interested parties, as appropriate, including import control authorities in interested foreign countries.

3. Reduction of Burden through Information Technology

There are no legal obstacles to reducing the burden associated with this information collection. Licensees and applicants may utilize information technology if they so desire; however, no responses have been submitted electronically.

4. Effort to Identify Duplication and Use Similar Information

The Information Requirements Control Automated System (IRCAS) was searched to determine agency duplication. None was found.

5. Effort to Reduce Small Business Burden

The requirements specified in §§ 110.20, 110.31, and 110.32 are the same for large and small businesses, because the proliferation and policy concerns are the same; therefore, all businesses must provide the same data. To reduce small business burden, the NRC has established new general licenses which exempt from new controls many of the shipments that were of particular concern to small businesses. Further, the NRC allows small businesses to apply for broad, long-term licenses to export materials to reduce burdens associated with paperwork expenses, license application fees, and uncertainties in delivery.

6. Consequences to Federal Program or Policy Activities if the Collection Is Not Conducted or is Conducted Less Frequently

The information requested in §§ 110.20-110.23 cannot be collected less frequently because it reflects the International Atomic Energy Agency (IAEA) Code of Practice on the International Transboundary Movement of Radioactive Waste to help ensure that radioactive waste coming into or leaving the U.S. is subject to U.S. Government approval and consent of other involved parties.

The information requested in §§ 110.31-32 with respect to exports is submitted only when deemed necessary by exporters and is keyed to the decision criteria that guides the NRC in approving or denying applications. It specifically incorporates the requirements of the Atomic Energy Act of 1954, as amended, for export. Therefore, if the collection is not conducted or is conducted less frequently, a person who wishes to export under NRC's export authority would be unable to do so because the NRC would not be able to make the necessary determination on whether an export license should be issued.

7. Circumstances Which Justify Variation From CMB Guidelines None.

8. Consultations Outside the NRC

Notice of opportunity for comment was published in the Federal Register on November 4, 1996 (61 FR 56714). No comments were received.

9. Payment or Gift to Respondents Not applicable.

10. Confidentiality of the Information

Normally none of the information referred to in §§ 110.31-32 is considered confidential or proprietary. However, when the exporter specifically requests the NRC to keep the information confidential, the NRC will treat the information as "Company Proprietary."

11. Justification for Sensitive Questions

There are no sensitive questions.

12. Estimated Burden and Burden Hour Cost

All licensees comply equally with the export requirements of §§ 110.20, 110.21, 110.22, 110.23 and §§ 110.31 and 110.32. Based upon our experience, for the collection in § 110.31, we estimate 63 applications will be filed on NRC Form 7 annually and another 70 applications will be

filed annually by letter which is approved under control number 3150-0036. Using a cost of \$120 per hour, the annual cost required to prepare the NRC Form 7 is estimated as follows:

Annual Reporting or Disclosure Burden for NRC Form 7:

<u>Annual Number of Respondents</u>	<u>Annual Number of Responses per Respondent</u>	<u>Hours per Response</u>	<u>Total Hours</u>	<u>Cost</u>
60	1	2	120	\$14,400
(incidental radioactive material export filings under §§ 110.19(b), 110.20(a)(1), 110.21(e), 110.22(f), 110.23(e); nuclear material and equipment export submissions under §§ 110.31-110.32, except radioactive waste)				
3	1	10	30	3,600
(radioactive waste export submissions under § 110.31-110.32)				
63			150	18,000

Total annual burden is estimated at 150 hours at a cost of \$18,000 (150 x \$120).

13. Estimate of Other Additional Costs None.

14. Estimated Annualized Cost to the Federal Government

The collection and processing of information on NRC Form 7 under 10 CFR Part 110 associated with the collections referred to in §§ 110.19-110.23, and §§ 110.31-110.32 are less than currently approved by OMB. We estimate that it will require approximately 700 NRC professional staff hours per year related to data entry, data base management, and subsequent reporting and recordkeeping. Annual labor cost to the Federal Government at \$120 per staff hour is \$84,000 (700 hours x \$120). This estimate covers only the information collection and handling costs associated with NRC Form 7. Additional costs for information storage, coding, tabulating, and responding to public inquiries are approximately \$36,000 per year (300 hours x \$120). The total annual cost to the Federal Government is approximately \$120,000. Much of this cost is recovered through fee assessments to NRC licensees pursuant to 10 CFR Part 170. (See OMB approval number 3150-0036 for costs associated with other requirements under 10 CFR Part 110.)

15. Reasons for Changes in Burden or Cost

The change in burden reflects a correction in the collection associated with § 110.31 and the impact of three final rules to 10 CFR 110, "Import and Export of Radioactive Waste;" "Specific Licensing of Certain Alpha-Emitting Radionuclides and Byproduct Material;" and the rule concerning Uranium Conversion Facility, Restricted and Embargoed Destinations, Component general license, that were codified after our 1994 submission for clearance. OMB Information Change Worksheets were submitted and approved for the three rules.

In the previous table, we showed three categories of respondents. This is changed to two. The first: "standard applications," "alpha-emitting radionuclides," "incidental radioactive material" filings, and, though there has been no impact yet, the burden associated with the rule that transferred licensing authority for uranium conversion facilities from the Department of Commerce to NRC and removed countries from the embargoed and restricted destinations lists. Burden hours are estimated at 2 hours per response: an increase from 1.5 to 2 hours for "standard applications," which is a more accurate reflection of the burden; and a decrease from 3 to 2 hours for "alpha-emitting radionuclides," which reflects a lesser burden than previously estimated. Because we overstated the collection associated with § 110.31 in our previous submission, the number of responses is decreased substantially from 156 to 63. The overstatement was due to the inclusion of license renewal and license amendment submittals which are covered under OMB control number 3150-0036.

In the second category, we still estimate 3 submittals for radioactive waste exports. Burden hours associated with such exports have decreased from 20 to 10 hours per response because its impact has been less than expected. Overall, the total number of NRC Form 7 submittals per year has decreased from 159 to 63 (60 + 3), and the total annual burden has decreased from 335 hours to 150 hours.

16. Publication for Statistical Use Not applicable.
17. Reason for Not Displaying the Expiration Date The expiration date is displayed.
18. Exceptions to the Certification Statement There are no exceptions.

B. COLLECTIONS OF INFORMATION EMPLOYING STATISTICAL METHODS
Not applicable.

(MM-YY)

10 CFR 110

**APPLICATION FOR LICENSE TO EXPORT
NUCLEAR MATERIAL AND EQUIPMENT***(See Instructions on Reverse)*

Estimated burden per response to comply with this information collection request: 2.4 hours. This mandatory submittal is reviewed to ensure that the applicable statutory, regulatory, and policy considerations are satisfied. Forward comments regarding burden estimate to the Information and Records Management Branch (T-6 F33), U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, and to the Paperwork Reduction Project (3150-0027), Office of Management and Budget, Washington, DC 20503. NRC may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

U.S. NUCLEAR REGULATORY

INSTRUCTIONS FOR PREPARATION OF APPLICATION FOR LICENSE TO EXPORT NUCLEAR MATERIAL AND EQUIPMENT, NRC FORM 7

One signed, original of NRC Form 7 must be submitted by the applicant to the Director for Nonproliferation, Exports and Multilateral Relations, Office of International Programs, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, or delivered in person to the Commission's Offices at 11555 Rockville Pike, Rockville, Maryland. Except for the shaded areas, all applicable items on this form should be completed, to the extent the information is available at the time the application is submitted.

An applicant for an export license must make full disclosure of all recipients of the proposed export so that a decision on the application may be made with full knowledge of all relevant facts. The name(s) and address(es) of the plant, facility, firm, or location where the material may be handled, stored, converted, or fabricated and where the material ultimately will be used, together with precise facts concerning the use that will be made of the items to be exported by each intermediate and ultimate consignee must be stated. The materials or equipment to be exported must be fully and accurately described in detail. If more space is needed, attach an additional sheet of paper.

The following is excerpted from the Nuclear Regulatory Commission regulations prescribing procedures and standards for the export and import of nuclear equipment and nuclear material. For the complete codification of NRC's export and import regulations, applicants for licenses should refer to Part 110 of Title 10, Chapter 1, Code of Federal Regulations.

§110.31 Application for a specific license

(a) A person shall file an application for a specific license to export or import with the Director for Nonproliferation, Exports, and Multilateral Relations, Office of International Programs, U.S. Nuclear Regulatory Commission, Washington, DC 20555. The application may be delivered to the Commission's Offices at 11555 Rockville Pike, Rockville, Maryland 20852 or at 2120 L Street, NW. (Lower Level), Washington, DC 20037.

(b) An application for a specific license to export or import must be accompanied by the appropriate fee in accordance with the fee schedule in §170.21 and §170.31 of this chapter. A license application will not be processed unless the specified fee is received.

(c) A license application should be filed on NRC Form 7, except that an import license application and a production or utilization facility export license application should be filed by letter.

(d) Each person shall provide in the license application, as appropriate, the information specified in §110.32. The Commission also may require the submission of additional information if necessary to complete its review.

(e) An application may cover multiple shipments and destinations.

(f) The applicant shall withdraw an application when it is no longer needed. The Commission's official files retain all documents related to a withdrawn application.

§110.32 Information required in license applications for a specific license/NRC Form 7.

- (a) Name and address of applicant.
- (b) Name and address of supplier of equipment or material.

(c) Country of origin of equipment or material, if known.

(d) Names and addresses of all intermediate and ultimate consignees, other than intermediate consignees performing shipping services only.

(e) Dates of proposed first and last shipments.

(f) Description of the equipment or material including, as appropriate, the following:

(1) Maximum quantity of material in grams or kilograms (curies for byproduct material) and its chemical and physical form.

(2) For enriched uranium, the maximum weight percentage of enrichment and maximum weight of contained U-235.

(3) For nuclear equipment, total dollar value.

(4) For nuclear reactors, the name of the facility and its design power level.

(5) For proposed exports or imports of radioactive waste, and for proposed exports of incidental radioactive material--the volume, classification (as defined in §61.55 of this chapter), physical and chemical characteristics, route of transit of shipment, and ultimate disposition (including forms of management) of the waste.

(6) For proposed imports of radioactive waste--the industrial or other process responsible for generation of the waste, and the status of the arrangements for disposition, e.g., any agreement by a low-level waste compact or State to accept the material for management purposes or disposal.

(7) Description of end use by all consignees in sufficient detail to permit accurate evaluation of the justification for the proposed export or import, including the need for shipment by the dates specified.
