

August 2, 1985

MEMORANDUM FOR: Frank Miraglia, Deputy Director
Division of Licensing

THRU: Gus C. Lainas, Assistant Director
for Operating Reactors

Edward J. Butcher, Acting Chief
Operating Reactors Branch #3
Division of Licensing

FROM: Kenneth L. Heitner, Project Manager
Operating Reactors Branch #3, DL

SUBJECT: NUREG-0737 SUPPLEMENT I CONFIRMATORY
ORDER FOR FORT ST. VRAIN

Walt Paulson of ORB#5 brought to my attention in April 1985 that Fort St. Vrain still lacked a NUREG-0737 Confirmatory Order. An order package (attached) was prepared based on previous drafts. The licensee provided an updated status letter on April 30, 1985 and the order package was made consistent with that submittal.

Justification for Implementation Dates Beyond 1985

The implementation dates for installing the Safety Parameter Display System (SPDS) and compliance with RG 1.97 have been affected by Fort St. Vrain's unique design. The licensee required additional time to evaluate the NRC requirements. Additional interaction with the staff was required to determine what were comparable requirements for the Fort St. Vrain plant. The licensee requested pre-implementation review of the SPDS, but this delayed the schedule over six months.

Kenneth L. Heitner, Project Manager
Operating Reactors Branch #3
Division of Licensing
