

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D. C. 20555

December 18, 1995

MEMORANDUM TO: Thomas T. Martin, Regional Administrator  
Region I

FROM: William T. Russell, Director *W. Russell*  
Office of Nuclear Reactor Regulation

SUBJECT: EXTENSION OF SALEM SALP

The purpose of this memorandum is to provide NRR concurrence to extend the SALP evaluation period for the Salem facility until one year after the restart of the first unit from its current outage. Your justification (attached) was consistent with the guidance in NRC Management Directive 8.6.

Your letter requested suspension of the Salem SALP. SALP is only suspended for plants that are shut down and require authorization by the Commission (not the staff) to restart.

Attachment: As stated
