URFO:GCP
 Docket No. 40-8745
 04008745531E

Ogle Petroleum Inc. of California
 ATTN: Mr. Glenn J. Catchpole
 2510 East 15th, #8
 Casper, Wyoming 82609

Gentlemen:

The Uranium Recovery Field Office (URFO) has completed its review of your request of July 12, 1985, to amend Source Material License No. SUA-1396 to permit reduced monitoring and staffing at the Bison Basin project. Although we have found the proposed reductions to be acceptable considering the dormant status of the facility, various questions about the license itself preclude our issuing a formal amendment at this time.

Until such time as these questions are resolved, this letter will serve as written authorization to implement the aforementioned monitoring and staffing reductions. Implementation, however, is conditioned upon receipt by this office of the following items related to the Ogle family of corporations:

1. Independently-audited financial statements for OPIC, OPI (Delaware), ORI and OPI (Colorado), from 1978 to date.
2. A copy of the legal documents that dissolved OPI (Colorado).
3. Copies of documents that transferred uranium-related assets of OPI (Colorado) through ORI, OPI (Delaware), and eventually to OPIC.
4. Copies of any recent (previous 2 years) data not routinely supplied to NRC on ground-water conditions at the site.
