I have reviewed the June 1985 progress report for FIN B7372. The work performed during June 1985 has been fully satisfactory.

On July 22, 1985 I received additional baseline monitoring data from DC-19, DC-20, and DC-22 through May 1985. I intend to make reproductions of this material and send you a copy this week.

On future document reviews, please make the document summary portion of the review more concise (less than two pages). The main emphasis of the review should be on identifying and discussing the problems, deficiencies and limitations of the report. The summary should be more like an abstract in format and content.

The action taken by this letter is considered to be within the scope of the current contract NRC-02-82-044. No changes to cost or delivery of contracted services and products are authorized. Please notify me immediately if you believe that this letter would result in changes to cost or delivery of contracted products.

Sincerely,
