

MAR 20 1985

MEMORANDUM FOR: Robert S. Brown, Jr., Director
Planning and Program Analysis Staff, NMSS

FROM: Richard E. Cunningham, Director
Division of Fuel Cycle and Material Safety, NMSS

SUBJECT: ENVIRONMENTAL REVIEW SUPPORT - ANL

We request that a revised proposal be obtained from Argonne National Laboratory (ANL) for future work in support of our ongoing effort related to the decommissioning of the Kerr-McGee Rare Earths Facility. The work will involve preparation of a supplemental environmental statement and providing expert testimony for the hearing.

The statement of work previously used for the ANL work (see September 29, 1982, attachment to DOEW 50-83-01) should be modified to reflect the new work. Paragraphs 2.0, 3.2, and 6.0 should be rewritten as shown in the enclosure.

In their proposal, ANL should provide a schedule for preparation of the environmental statement.

Original Signed by
D. R. Chapell

Richard E. Cunningham, Director
Division of Fuel Cycle and
Material Safety, NMSS

Enclosure: As stated
