NOTICE OF VIOLATION

Scioto Memorial Hospital

License No. 34-15938-02

As a result of the inspection conducted on July 18, 1985, and in accordance with the General Policy and Procedures for NRC Enforcement Actions, (10 CFR Part 2, Appendix C), the following violation was identified:

License Condition No. 20 requires that licensed material be possessed and used in accordance with the statements, representations, and procedures contained in certain referenced applications and letters.

The referenced letter dated February 22, 1983 states that area surveys will be performed daily using a survey instrument sufficiently sensitive to detect 0.05 mr/hr. Wipe tests will be performed weekly to identify contaminated laboratory areas.

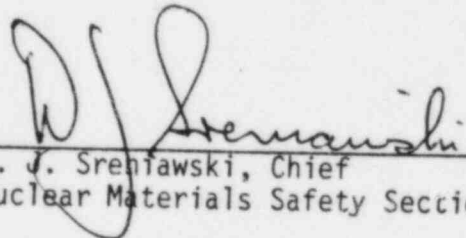

Contrary to the above, you have not been meeting these requirements. During a two to three week period every year, while your G. M. survey meter is being calibrated, you have not been performing weekly wipe tests to identify contaminated laboratory areas. In addition, during this period you have been performing your area surveys using an ionization chamber type survey meter, which is not sufficiently sensitive to detect 0.05 mr/hr.

This is a Severity Level V violation (Supplement VI).

Pursuant to the provisions of 10 CFR 2.201, you are required to submit to this office within thirty days of the date of this Notice a written statement or explanation in reply, including for each item of noncompliance: (1) corrective action taken and the results achieved; (2) corrective action to be taken to avoid further noncompliance; and (3) the date when full compliance will be achieved. Consideration may be given to extending your response time for good cause shown.

Dated

8/8/85
