Redstone Arsenal, Alabama 35898-5400

SUBJECT: NRC INSPECTION REPORT 030-03628/96-01

Dear Mr. Komp:

This refers to the special, announced inspection completed by the NRC on August 30, 1996. An interim exit briefing was conducted with you at the conclusion of the onsite portion of the inspection. Following the review of survey and swipe sample analysis data, a telephonic exit briefing was conducted with Jerry Grey of your office on September 16, 1996. The enclosed NRC Inspection Report 030-03628/96-01 documents this inspection.

The inspection was conducted to observe Building 300 at the Sacramento Army Depot and, by actual radioactivity measurement and swipe sample analysis, verify that Building 300 was decommissioned in accordance with NRC requirements and eligible for license termination as requested by the licensee.

Based on the results of this inspection and confirmatory survey, and a review of the licensee consultant's radiation survey and swipe sample analysis, the NRC staff can find no evidence of any licensed material above natural background remaining at Building 300.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be placed in the NRC Public Document Room.

Should you have any questions concerning this letter, please contact James L. Montgomery at (510)975-0249.

Sincerely,

Frank A. Wenslawski, Chief
