NUCLEAR REGULATORY COMMISSION

REGION IV

URANIUM RECOVERY FIELD OFFICE
BOX 25325
DENVER, COLORADO 80225

Docket No. 40-8771

MAY 23 1983

Malapai Resources Company
ATTN: Mike Beck
Post Office Box 20824
Phoenix, Arizona 85036

Dear Mr. Beck:

The Nuclear Regulatory Commission's Uranium Recovery Field Office (URFO) officially opened in Lakewood, Colorado on October 4, 1982. Although the office opened in October, the technical review staff have remained in the Washington, D.C area until this spring. However, relocation for the technical staff has begun, and the URFO office in the Washington, DC area is being phased out. To facilitate the processing of routine letter correspondence I am requesting that all future correspondence concerning your uranium recovery facility be sent to the following address effective June 1, 1983.

USNRC Uranium Recovery Field Office
P.O. Box 25325
Denver, CO 80225(0325)

If your submittal involves a bulk shipment (Federal Express, etc.), the proper street address for the URFO Denver office is

USNRC Uranium Recovery Field Office
Lakewood Office Plaza
730 Simms Street, Suite 100A
Golden, CO 80401

The telephone number for the Denver Field Office is 303/234-7232. We thank you for your cooperation and assistance during the next few months while the technical staff are being relocated. Upon arrival in Denver of the project manager assigned to your facility, he or she will contact you and advise you of their new phone number.

Sincerely,

R. Dale Smith
R. Dale Smith, Director
Uranium Recovery Field Office
Region IV
