Fitness For Duty Program Performance Data Report

During the reporting period, July through December 1996, the Trojan Nuclear Plant Security Department continued to operate under the Trojan Nuclear Plant Security Plan (Defueled Condition). The Security Plan contains a commitment that a Fitness For Duty Program be maintained which implements the requirements of 10 CFR 26 for unescorted access to the Trojan Protected Area.

Effectiveness Summary

One positive pre-access drug test occurred during this reporting period.

One positive observed behavior breath alcohol test occurred during this reporting period.

During the reporting period the Fitness For Duty Program was subjected to a NRC audit. No violations resulted from the audit.

During this reporting period the Trojan Plant Fitness For Duty staffing level remained at two personnel.

Events Reported

One reportable event occurred during the six-month reporting period. This event occurred as a result of a positive observed behavior breath alcohol test.

Statistical Summary

During the reporting period, the Fitness For Duty Program conducted 39 pre-access drug and alcohol tests, 61 random drug and alcohol tests, 1 reasonable suspicion test, 0 post-accident tests, and 2 follow-up drug and alcohol tests. PGE's overall positive rate for the random screening program was 0 percent (0 percent for PGE employees and 0 percent for contract personnel). The positive rate for all screenings during the period July through December 1996, is 1.9 percent.

The Trojan Nuclear Plant average population during the reporting period was 208. The total number of random tests was 61. At the end of the reporting period, PGE had randomly screened 29.3 percent of the average plant population granted protected area unescorted access. During this period 39 pre-access tests were completed.
