JOHN MENKART
SENIOR VICE PRESIDENT

July 10, 1985

Nuclear Regulatory Commission
Region I
631 Park Avenue
King of Prussia, Pennsylvania 19406

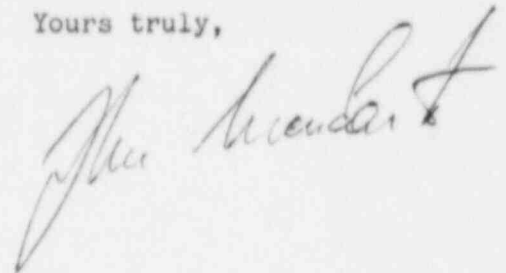

Gentlemen:

Re: License No. 06-11703-02; Docket No. 030-03829 EA 85-66

This is in response to your letter of June 12 and the attached Notice of Violation (Inspection Report No. 030-03829/85-01) concerning the unauthorized use of radioactive materials at our facility in Stamford, Connecticut. As you know, this matter was discussed in extenso with Dr. McFadden (the NRC Inspector); I wish to reaffirm that the incident was inadvertent, stemming from our belief that the tests involving human subjects were not in violation of our license.

The issue has now been clarified and our personnel engaged in experimentation with radioactive materials have been instructed that no human application be carried out at Clairol facilities until an appropriate license for doing so is granted. There has not been any human use of the licensed material since September 12, 1984 - a date confirmed by the Inspector.

Yours truly,

JM:lk
