Document Control Desk
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Reference: 10 CFR, Part 21 Courtesy Notification

To Whom It May Concern:

This letter provides to the Nuclear Regulatory Commission a courtesy notification as referenced by 10 CFR Part 21, paragraph 21.21, (4).

ACCUTECH, a division of B&G Manufacturing Co., Inc. ("B&G"), recently determined that heavy hex bolts supplied by the now defunct Cardinal Industrial Products, L.P. ("CIP") in 1992 may be nonconforming.

On July 10, 1995, B&G purchased the name and certain other assets from CIP, a limited partnership that had been formed and operated in Nevada. B&G began its own nuclear fastener business at the same Nevada site and temporarily used the "Cardinal Industrial Products" name before officially adopting the trade name of ACCUTECH in December, 1995.

We believe this possible nonconformance situation was the result of insufficient heat treating performed by CIP at the Nevada site. The heavy hex bolts under discussion are trace code M2.

Even though B&G is not bound to take formal action under 10 CFR Part 21, and the obligation for 10 CFR Part 21 statutory notifications remains with CIP, as a courtesy B&G is notifying the NRC of the situation. In addition, based upon records acquired from CIP, B&G is sending courtesy notifications to customers who were shipped product from this lot by Cardinal Industrial Products, L.P.

Sincerely yours,

A handwritten signature in dark ink, appearing to read 'Roy P. Reindl', is written over a horizontal line.

Roy P. Reindl
Branch Manager, Nevada

COURTESY PART 21 NOTIFICATION

"THIS LETTER PROVIDES TO THE NUCLEAR REGULATORY COMMISSION A COURTESY NOTIFICATION AS REFERENCED BY 10 CFR PART 21, PARAGRAPH 21.21, (4).

ACCUTECH, A DIVISION OF B&G MANUFACTURING CO., INC. (B&G), RECENTLY DETERMINED THAT HEAVY HEX BOLTS SUPPLIED BY THE NOW DEFUNCT CARDINAL INDUSTRIAL PRODUCTS, L.P. (CIP) IN 1992 MAY BE NONCONFORMING.

ON JULY 10, 1995, B&G PURCHASED THE NAME AND CERTAIN OTHER ASSETS FROM CIP, A LIMITED PARTNERSHIP THAT HAD BEEN FORMED AND OPERATED IN NEVADA. B&G BEGAN ITS OWN NUCLEAR FASTENER BUSINESS AT THE SAME NEVADA SITE AND TEMPORARILY USED THE 'CARDINAL INDUSTRIAL PRODUCTS' NAME BEFORE OFFICIALLY ADOPTING THE TRADE NAME OF ACCUTECH IN DECEMBER, 1995.

WE BELIEVE THIS POSSIBLE NONCONFORMANCE SITUATION WAS THE RESULT OF INSUFFICIENT HEAT TREATING PERFORMED BY CIP AT THE NEVADA SITE. THE HEAVY HEX BOLTS UNDER DISCUSSION ARE TRACE CODE M2.

EVEN THOUGH B&G IS NOT BOUND TO TAKE FORMAL ACTION UNDER 10 CFR PART 21, AND THE OBLIGATION FOR 10 CFR PART 21 STATUTORY NOTIFICATION REMAINS WITH CIP, AS A COURTESY B&G IS NOTIFYING THE NRC OF THIS SITUATION. IN ADDITION, BASED UPON RECORDS ACQUIRED FROM CIP, B&G IS SENDING COURTESY NOTIFICATIONS TO CUSTOMERS WHO WERE SHIPPED PRODUCT FROM THIS LOT BY CARDINAL INDUSTRIAL PRODUCTS, L.P."

THE DEFECTIVE ITEMS AND CUSTOMERS ARE AS FOLLOWS:

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are approximately 20 lines visible. The paper appears to be from a notebook or a set of legal pads. The edges of the paper are slightly irregular, suggesting it might be a scan of a physical document. There is no handwriting or other markings on the page.
