

AUG 13 1985

Docket Nos. 50-213, 50-245, 50-336

Northeast Nuclear Energy Company
Connecticut Yankee Atomic Power Company
ATTN: Mr. J. F. Opeka
Senior Vice President - Nuclear
Engineering and Operations Group
P. O. Box 270
Hartford, Connecticut 06101

Gentlemen:

Subject: Systematic Assessments of Licensee Performance (SALPs)

This refers to the Haddam Neck and Millstone 1 and 2 SALPs we discussed with you and your staff on June 4, 1985 at the Millstone site. Your comments on our SALPs have been reviewed. The SALP reports and your submittals are enclosed.

Our overall assessment is that there is a high degree of management attention and involvement directed at safe operation of the three units. The ratings for the Millstone units, in particular, reflect your commitment to a high level of performance. Nonetheless, there are areas where we perceive performance has declined at Haddam Neck and where more management attention is needed.

We acknowledge your comment on Functional Area I of the Haddam Neck SALP. The statement you questioned related to deviations from normal QA requirements and after-the-fact determinations of quality. Although we are not changing the SALP rating, we have modified the discussion in the report.

No reply to this letter is required. Your actions on the enclosed SALPs will be reviewed during regular inspections of your facilities.

Your cooperation with us is appreciated.

Sincerely,

Original signed by
Thomas E. Murley
