

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D. C. 20555

NOV 20 1984

MEMORANDUM FOR: James Meyer, Technical Assistant  
to Commissioner Bernthal  
Ann Tipton, Administrative Assistant  
to Commissioner Zech

FROM: Edwin G. Triner, Director  
Division of Budget and Analysis  
Office of Resource Management

SUBJECT: BACKGROUND INFORMATION ON WOLF CREEK NUCLEAR  
GENERATING STATION

Attached is the information you requested on the Wolf Creek Nuclear Generating Station for the Commissioners' upcoming trips.

The information was primarily obtained from the Licensing Project Manager, the Resident Inspector, Region IV personnel and the Office of Investigations.

If you have any questions, please contact me.

Edwin G. Triner, Director  
Division of Budget and Analysis  
Office of Resource Management

BACKGROUND INFORMATION  
ON  
WOLF CREEK NUCLEAR GENERATING STATION

Utility: Kansas Gas and Electric (KG&E)  
Location: 3.5 Mi NE of Burlington, Kansas  
Coffey County, Kansas

Docket No.:	50-482
CPPR Date:	5/17/77
Applicant's Est. Fuel Load Date:	12/26/84
Reactor Type:	PWR
Power Level:	1150 MWe (DER); 3425 MWt (DTP)
Architect/Engineer:	Bechtel
NSSS Vendor:	Westinghouse
Constructor:	Daniel International
Turbine Supplier:	General Electric
Condenser Cooling Method:	Cooling Lake
Condenser Cooling Water:	Man-Made Lake

Licensing Project Manager: Paul O'Conner, NRR (Tel: 49-24708)

RIV Task Force (TF): Lawrence Martin, Sec. Chief, TF, RIV (Tel: 8-728-8153)  
Richard Denise, Dir. TF, RIV (Tel: 8-728-8106)  
Resident Inspection Prog.: William Guldeman, Chief (Tel: 8-316-364-8653)  
Resident Inspector: Howard Bundy (Tel: 8-316-364-8653)  
Resident Inspector: Bruce Bartlett (Tel: " " " )

Enforcement/Allegations: Tom Westerman, RIV (Tel: 8-728-8145)  
Investigations: Connie Spagnoli, Secretary, OI:RIV (Tel: 8-728-8286)  
(Richard Herr, Director, OI:RIV)  
Operators/Exams: Eileen Haycraft, RIV (Tel: 8-728-8253)  
SALP Review: Lawrence Martin, RIV (Tel: 8-728-8153)  
Emergency Preparedness: Charles Hackney, RIV (Tel: 8-728-8188)

Report Prepared By: Linda Underwood, RM/MS (Tel: 492-4977)

Site Management Personnel (KG&E)

Glen Koester, Vice President, Nuclear  
Charles Mason, Director, Nuclear Operations  
Forrest Rhodes, Plant Manager  
Richard Grant, Quality Assurance Director  
William Rudolph, Quality Assurance Manager

Operating License

The hearing on the operating license for Wolf Creek was completed on February 16, 1984. On July 2, 1984, the Atomic Safety Licensing Board issued an initial decision favorable to the applicant for the operation of Wolf Creek Nuclear Generating Station.

## Wolf Creek Nuclear Generating Station

### Caseload Forecast Panel/Fuel Load Date

On May 24, 1984, the NRC Caseload Forecast Panel visited the Wolf Creek site for the purpose of reviewing construction progress and obtaining information for assessing KG&E's projected fuel load date.

By letter dated June 19, 1984, KG&E informed the NRC staff that they had revised their fuel load estimate from October to November-December 1984. The Caseload Forecast Panel has concluded that construction completion of the Wolf Creek Generating Station in this timeframe is achievable.

The applicant's current estimated fuel load date is December 31, 1984.

### Plant Status

Construction on the Wolf Creek plant is approximately 99 percent complete.

The following items remain to be completed:

- ° Containment leak rate test and structural integrity test.
- ° Loss of off-site power test.
- ° Electrical load sequencing and shedding.
- ° Engineering safeguards actuation test.

Preoperational testing is nearing completion.

Hot-functional testing has been completed.

### Fuel/Spent Fuel Pool

Fuel for the reactor is manufactured by Westinghouse. Fuel for the initial loading is on site. The spent fuel pool has been completed and racks are in place.

### Workforce

Total manpower stationed at the Wolf Creek site is 3382 which includes:

#### KG&E Personnel

1157

#### Contract Workers

2225

### Reactor Operators

There are 33 licensed senior reactor operators (SROs) and 5 licensed reactor operators (ROs) for the Wolf Creek plant.

## Wolf Creek Nuclear Generating Station

### Reactor Operator Exams

<u>Date of Exam</u>	<u>Number of Applicants</u>	<u>Passed</u>	<u>Failed</u>
May 1984	23 SROs 4 ROs	18 SROs 4 ROs	5 SROs -
Sept. 1984	17* SROs 2 ROs	15 SROs 1 RO	2 SROs 1 RO

\* Includes 5 retakes from first exam, all 5 retakes passed.

Next Scheduled  
Exam: April 1985

### Enforcement

A Proposed Civil Penalty in the amount of \$75,000 was issued on November 21, 1984 to KG&E regarding "Welding Structural Steel".

Enforcement action is pending regarding "Harassment of Employee" by KG&E.

### Special Task Force

A special task force was established by Region IV to ensure that all required inspections of the plant would be completed in time for licensing.

### Systematic Assessment of Licensee Performance (SALP)

A SALP review was conducted for the period August 1, 1982 through July 31, 1983 and a report issued on November 2, 1983. A copy of this report is attached.

A draft report is in progress for the current review period of August 1, 1983 through September 30, 1984.

### Allegations

A list of allegations received for the Wolf Creek plant is attached.  
(Computer run date: 11/20/84.)

### Investigations

Case File No. 4-84-026, opened 4/12/84.

Subject: 1

Status: Investigation to be conducted in December 1984.

Case File No. 04-84-042, opened 9/28/84

Subject:

Status: Investigation was initiated; interview was conducted; report pending, estimated completion November 1984.

## Wolf Creek Nuclear Generating Station

### Investigations (continued)

Case File No.: 04-84-084, opened 10/24/84.

Subject: Alleged reprisal against former employee for identifying safety issues.

Status: Investigation in progress. Anticipated completion January 1985.

### Emergency Preparedness

A full scale emergency preparedness exercise was conducted on November 7, 1984. The licensee, State and local counties participated. The NRC and FEMA observed the exercise. The Prompt Public Notification System was activated.

The Emergency Operations Facility has been completed and is operational. However, some radiological equipment and alarms are still to be installed.

The Technical Support Center has been completed and is operational.

The Region IV office completed a pre-operational inspection on September 17-28, 1984.

### Site Location and Surrounding Areas

The Wolf Creek Generating Station, Unit No. 1 (WCGS) is located in eastern Kansas approximately 75 miles southwest of Kansas City, 53 miles south of Topeka, and 100 miles east-northeast of Wichita, Kansas. The plant site is near the center of Coffey County in Hampden Township, 3.5 miles northeast of the city of Burlington and 3.5 miles east of the Neosho River and the main dam at John Redmond Reservoir. Figure 2.1-1 shows the location of the site in Kansas, and Figure 2.1-2 locates it in Coffey County.

Of the 11,882 acres owned by the applicant on and near to the WCGS site, 9,818 acres are occupied by the site, and 1,976 acres lie outside of the site boundary. The acreage beyond the site boundary is leased as farmland and pastureland. The railroad right-of-way to the site boundary occupies about 148 acres, 88 acres of which are owned by the applicant. Figure 2.1-3 shows the land owned by the applicant.

Figure 2.1-5 shows the layout for the cooling lake, dams, dikes, and spillways.

The plant exclusion area, shown on Figure 2.1-6, lies within the site boundary and encompasses approximately 1,118 acres, which are owned by the applicant. This area is traversed only by the access road to the plant.

The transportation network in the site vicinity is shown on Figure 2.1-7. The main highway artery in the plant site area is U.S. Highway 75. The four other major roads within a 5-mile radius of the plant are the federal-aid secondary routes 10, 149, 153, and 1472. There is no commercial water traffic on the Neosho River or John Redmond Reservoir. The nearest existing railroad to the site is the Missouri Pacific Railroad located 9.5 miles southeast of the site boundary. A spur connecting the site with this track was constructed to provide rail access to the site.

## Wolf Creek Nuclear Generating Station

### Site Location and Surrounding Areas (continued)

Cities and towns within 10 to 50 miles of the plant site are shown on Figure 2.1-8.

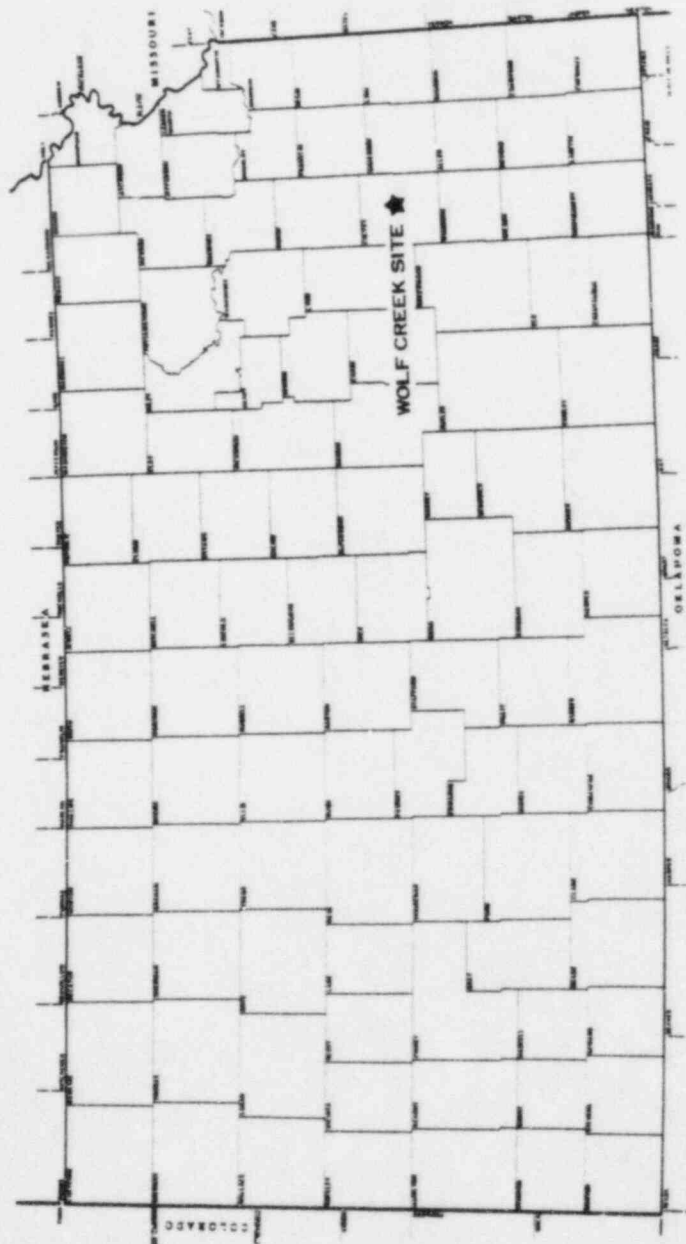

The two largest cities within 50 miles are Emporia (28 miles west-northwest) and Ottawa (32.5 miles northeast).

Figure 2.1-21 shows the location of public facilities and institutions within five miles of the site.
