Dear Ms. Pearson:

Please see the attached NRC form 314 requesting the termination of license number SUB 1496 for Carl E. Olson, M.D. at Sheboygan Regional Oncology Center 1222 N. 23rd Street Sheboygan, WI. The materials pertaining to this license (118 kilograms of depleted Uranium-235 in the form of Cadmium plated metal used for shielding in a Varian Associates linear accelerator) have been transferred and the machine decommissioned.

The transfer was completed on October 17, 1996 by:

Terry Cummins  
Centura X-ray  
4381 Emery Industrial Parkway  
Cleveland, Ohio 44128-5759  
(216) 831-7640

We have requested the recipient's NRC license number many times but have not received it as of this letter's date.

The depleted Uranium collimators and shielding used with the linear accelerator were removed in total with the machine. A radiation survey was not conducted since the entire assembly was transferred as a unit and not taken apart. No physical evidence of the linear accelerator remains.

If you have any questions regarding this license termination please feel free to call me (414) 457-6800.

Sincerely,

Jeff Shea, R.T.T., CMD

Dear Dr. Olson:

Enclosed is Amendment No. 02 which terminates your NRC License No. SUB-1496 in accordance with your request.

During a January 15, 1997, telephone conversation between Mr. Jeff Shea of the Oncology Center and Mr. Wayne Slawinski of the NRC Region III office, it was revealed that you did not furnish the transferee of the depleted uranium a copy of 10 CFR 40 and Form NRC-244 prior to the transfer as required by 10 CFR 40.25. This violation, however, is of minor significance and is being treated as a non-cited violation consistent with Section IV of NUREG 1600.

If you have any questions or require clarification on any of the information stated above, you may contact us at (630) 829-9887.

Sincerely,
