

JMG-194

Mr. Robert Hogg  
United States Nuclear Regulatory Commission  
Mail Stop T8D14  
Washington, DC 20555

June 3, 1996

Dear Mr. Hogg,

SUBJECT: Renewal of License SNM-1513

The Eastman Kodak Company currently possesses U-235 under NRC License SNM-1513 and uses this material as an integral part of our Californium Flux Multiplier (CFX). We intend to renew this license in 1998, since it expires in April of that year. We plan to purchase a new Cf-252 source for the CFX in 1997, and are currently making preparations for this purchase. Because of the cost of this purchase (~\$250,000), we would like an indication from the NRC before we spend these funds as to whether there are any factors which would prohibit license renewal, based on current and past Kodak compliance. (Note: our last inspection was April 1996, and no violations were received). We will treat any correspondence that you send regarding this request as unofficial, and realize that this note does not supplant a renewal request.

Please contact me at (716)-588-3324 if you need additional information. My mailing address is listed in the footer of this letter. We thank you in advance for any information sent.

Sincerely,

Joseph M. Greco
