ATTENTION: T. R. QUAY

SUBJECT: AP600 RADIOACTIVE WASTE MANAGEMENT SUPPLEMENTAL
INFORMATION

Dear Mr. Quay:

The enclosure to this letter provides information on the AP600 Radioactive Waste Management System design. This design is discussed in Chapter 11 of the AP600 Standard Safety Analysis Report (SSAR).

Requests for Additional Information (RAI) were provided to Westinghouse as part of the NRC review of the radioactive waste management systems and processes. Westinghouse responses to these RAIs were utilized in the preparation of the NRC's November 1994 Draft Safety Evaluation Report (DSER).

The enclosed information consolidates, into a single reference, RAI responses utilized by NRC staff as a basis for acceptance as documented in the November 1994 DSER. These RAI responses have been reviewed and updated where necessary to be consistent with Revision 9 of the AP600 SSAR.

Please contact John C. Butler on (412) 374-5268 if you have any questions concerning this transmittal.

Brian A. McIntyre, Manager
Advanced Plant Safety and Licensing
