

Appendix

NOTICE OF VIOLATION

Joseph Safko, M.D.

License No. 34-13165-01

As a result of the inspection conducted between June 25, 1985 and July 10, 1985, and in accordance with the General Policy and Procedures for NRC Enforcement Actions, (10 CFR Part 2, Appendix C), the following violations were identified:

1. License Condition No. 14 requires that licensed material be possessed and used in accordance with the statements, representations, and procedures contained in certain referenced applications and letters.

The referenced application dated February 28, 1979 states in Item 13 that all packages received containing licensed material will be monitored for radiation exposure at three feet and at the surface.

Contrary to the above, you have not been making the required surveys of packages containing licensed material since your previous inspection, March 17, 1982.

This is a Severity Level IV violation (Supplement VI).

2. License Condition No. 14 requires that licensed material be possessed and used in accordance with the statements, representations, and procedures contained in certain referenced applications and letters.

The referenced application dated February 28, 1979 states in Item 10 that survey instruments will be calibrated using procedures contained in NRC License No. 34-16779-01. License condition No. 16 of the referenced license requires survey instruments to be calibrated in accordance with Appendix D procedures, Sections 1 and 2, of Regulatory Guide 10.8. Part D of Section 1 of Appendix D requires that complete records of survey instrument calibrations be maintained.

Contrary to the above, you have not been maintaining records of your survey instrument calibrations. Specifically, your Picker 655186 survey meter bore a sticker indicating it had been calibrated in June of 1984, but you had no complete records of this or previous calibrations during the inspection.

This is a Severity Level V violation (Supplement VI).

3. License Condition No. 14 requires that license material be possessed and used in accordance with the statements, representations, and procedures contained in certain referenced applications and letters.

The referenced application dated February 28, 1979 states in Item 15 that each patient dose will be assayed prior to administration.

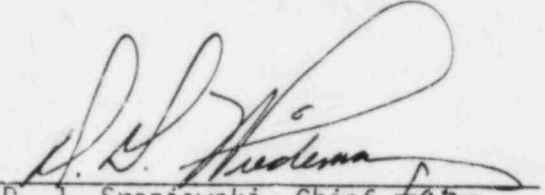

Contrary to the above, you have not been assaying patient doses prior to administration since the previous inspection on March 17, 1982.

This is a Severity Level IV violation (Supplement VI).

Pursuant to the provisions of 10 CFR 2.201, you are required to submit to this office within thirty days of the date of this Notice a written statement or explanation in reply, including for each item of noncompliance: (1) corrective action taken and the results achieved; (2) corrective action to be taken to avoid further noncompliance; and (3) the date when full compliance will be achieved. Consideration may be given to extending your response time for good cause shown.

AUG 02 1985
