

MATERIALS LICENSE

Amendment No. 17

Pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974 (Public Law 93-438), and Title 10, Code of Federal Regulations, Chapter I, Parts 30, 31, 32, 33, 34, 35, 36, 39, 40, and 41, and in reliance on statements and representations heretofore made by the licensee, a license is hereby issued authorizing the licensee to receive, acquire, possess, and transfer byproduct, source, and special nuclear material designated below; to use such material for the purpose(s) and at the place(s) designated below; to deliver or transfer such material to persons authorized to receive it in accordance with the regulations of the applicable Part(s). This license shall be deemed to contain the conditions specified in Section 183 of the Atomic Energy Act of 1954, as amended, and is subject to all applicable rules, regulations, and orders of the Nuclear Regulatory Commission now or hereafter in effect and to any conditions specified below.

301911

Licensee

In accordance with the letter dated
September 25, 19963. License Number 24-18968-01 is amended in
its entirety to read as follows:

4. Expiration Date March 31, 2001

5. Docket or
Reference No. 030-174146. Byproduct, Source, and/or
Special Nuclear Material7. Chemical and/or Physical
Form8. Maximum Amount that Licensee
May Possess at Any One Time
Under This LicenseA. Any byproduct
material identified
in 10 CFR 35.100A. Any
radiopharmaceutical
identified in 10 CFR
35.100

A. As needed

B. Any byproduct
material identified
in 10 CFR 35.200B. Any
radiopharmaceutical
identified in 10 CFR
35.200 (excluding
generators and
aerosols)

B. As needed

C. Any byproduct
material identified
in 10 CFR 35.300C. Any
radiopharmaceutical
identified in 10 CFR
35.300 (excluding
iodine-131 for
thyroid carcinoma)C. As needed
(not to exceed one
curie of
iodine-131)

9. Authorized Use:

A. Medical use described in 10 CFR 35.100.

B. Medical use described in 10 CFR 35.200 (excluding generators and aerosols).

C. Medical use described in 10 CFR 35.300 (excluding iodine-131 for thyroid carcinoma).

Re: St. Peters Community Hospital, Inc. d/b/a Barnes St. Peters Hospital, Inc.
Change of Name; License 24-18968-01

Dear Sirs:

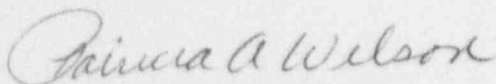

I am writing this letter to give notice that on April 29, 1996, the above-named corporation amended its Articles of Incorporation to change its name to Barnes-Jewish St. Peters Hospital, Inc. ("St. Peters"). This was a change of name only, with no change in the ownership of the hospital facility.

St. Peters owns and operates a hospital now known as Barnes-Jewish St. Peters Hospital ("Hospital"), formerly known as Barnes St. Peters Hospital. The name change was prompted by the merger of the corporate shareholder of St. Peters. Barnes Hospital, the shareholder, merged with The Jewish Hospital of St. Louis and is now Barnes-Jewish Hospital.

There have been no license amendment changes in our material license.

Please let me know if you need any further information regarding the above change.

Sincerely,

Patricia A. Wilson
Corporate Paralegal

	\$	\$	\$
	\$	\$	\$
	\$	\$	\$

FEE(s) DUE	\$	440.00
PAYMENT RECEIVED	\$	0.00
AMOUNT DUE	\$	440.00

- ☒ Your request was received without the prescribed application fee.
- ☐ We received your Check No. _____ in the amount of \$ _____. Payment of the additional fee noted above is required.
- ☐ Your request will increase the scope of your license program. Therefore, your request is subject to the application fee(s) noted above. Refer to Section 170.31 and Footnote 1(d)(2).
- ☐ Your license expired prior to the receipt of your application for renewal. Therefore, your request is subject to the application fee(s) noted above. Refer to Section 170.31 and Footnote 1(a).

MAKE PAYMENT OF THE FEE(S) TO THE U.S. NUCLEAR REGULATORY COMMISSION AND MAIL THE PAYMENT TO THE ADDRESS LISTED AT THE TOP OF THIS FORM. IF WE DO NOT RECEIVE A REPLY FROM YOU WITHIN 30 CALENDAR DAYS FROM THE DATE LISTED BELOW, WE SHALL ASSUME THAT YOU DO NOT WISH TO PURSUE YOUR APPLICATION AND WILL VOID THIS ACTION.

SIGNATURE -- LICENSE FEE ANALYST

SHIRLEY CRUTCHFIELD

II. FEE NOT REQUIRED

- ☐ Enclosed is Check No. _____ which accompanied your request. The fee is not required because:
- ☐ We received your Check No. _____ in payment of the fee.
- ☐ The Licensing staff has informed us that your request is to be considered as a continuation of your request dated _____, Control No. _____.
- ☐ Your request was combined, prior to review, with your _____ request, Control No. _____.

III. CHECK RETURNED

- ☐ Enclosed is Check No. _____ which was returned to us by the bank for:
- ☐ INSUFFICIENT FUNDS
- ☐ ACCOUNT CLOSED
- ☐ OTHER

MAIL THE REPLACEMENT CHECK TO THE ADDRESS LISTED AT THE TOP OF THIS FORM AND REFERENCE THE ABOVE CONTROL NUMBER.

IV. LICENSE ISSUED WITHOUT THE REQUIRED FEE

- ☐ License No. _____, Amendment No. _____, issued on _____ was issued without the required fee being collected. The fee required is noted in Section I of this form.
- ☐ The scope of your licensed program was increased. Therefore, your request is subject to the application fee(s) noted in Section I of this form. Refer to Section 170.31 and Footnote 1(d)(2).
- ☐ Because of the urgency of your request, the license was issued without remittance of the prescribed fee noted in Section I of this form.

DATE

(LEAVE BLANK)

OCT 15, 1996

JAN 21 1997

John Gloss, Administrator
Barnes-Jewish St. Peters Hospital
10 Hospital Drive
St. Peters, MO 63376

Dear Mr. Gloss:

This refers to the letter dated September 25, 1996 from Ms. Patricia A. Wilson, Corporate Paralegal, notifying NRC of the change of name from Barnes St. Peters Hospital to Barnes-Jewish St. Peters Hospital. This also refers to our telephone conversation with Mr. Jeff Springer, Chief Nuclear Medicine Technologist, on January 13, 1997.

Enclosed is Amendment No. 17 to your NRC Material License No. 24-18968-01 in accordance with your request. Please review the document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

As discussed with Mr. Springer, please be advised that your license was also updated in accordance with current NRC policy. Specifically: 1) License Condition No. 8.C. now includes a possession limit of one curie for iodine-131, 2) License Condition No. 12 was updated per the letter dated August 12, 1996 from Dr. William Dawson, Radiation Safety Officer, and 3) the previous License Condition No. 13 was dropped since it has been superseded by NRC regulations.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

Please be advised that your license expires at the end of the day, in the month, and year stated in the license. Unless your license has been terminated, you must conduct your program involving byproduct materials in accordance with the conditions of your NRC license, representations made in your license application, and NRC regulations. In particular, note that you must:

1. Operate in accordance with NRC regulations 10 CFR Part 19, "Notices, Instructions and Reports to Workers; Inspections," 10 CFR Part 20, "Standards for Protection Against Radiation," and other applicable regulations.

301911

2. Notify NRC, in writing, within 30 days:
 - a. When an authorized user or Radiation Safety Officer permanently discontinues performance of duties under the license or has a name change; or
 - b. When the licensee's mailing address changes (no fee is required if the location of byproduct material remains the same).
3. In accordance with 10 CFR 30.36(b) and/or license condition, notify NRC, promptly, in writing, and request termination of the license when you decide to terminate all activities involving materials authorized under the license.
4. Request and obtain a license amendment before you:
 - a. Receive or use byproduct material for a clinical procedure permitted under Part 35 but not permitted by your license issued pursuant to this Part;
 - b. Permit anyone, except individuals described in 10 CFR 35.13(b), to work as an authorized user under the license;
 - c. Change Radiation Safety Officers;
 - d. Order byproduct material in excess of the amount, or radionuclide, or form different than authorized on the license;
 - e. Add or change the areas of use or address or addresses of use identified in the license application or on the license; or
 - f. Change ownership of your organization.
5. Submit a complete renewal application with proper fee or termination request at least 30 days before the expiration date of your license. You will receive a reminder notice approximately 90 days before the expiration date. Possession of byproduct material after your license expires is a violation of NRC regulations. A license will not normally be renewed, except on a case-by-case basis, in instances where licensed material has never been possessed or used.

In addition, please note that NRC Form 313 requires the applicant, by his/her signature, to verify that the applicant understands that all statements contained in the application are true and correct to the best of the applicant's knowledge. The signatory for the application should be the licensee or certifying official rather than a consultant.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Policy and Procedures for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

Sincerely,

NRC INFORMATION NOTICE 89-25, REV. 1: UNAUTHORIZED TRANSFER OF OWNERSHIP
OR CONTROL OF LICENSED ACTIVITIES

Addressees

All fuel cycle and material licensees.

Purpose

NRC is issuing this revised information notice to clarify previous guidance concerning the information to be submitted to NRC, prior to a change of ownership or control. The notice also incorporates recent information from NRC's Office of the General Counsel (OGC) concerning the transferee's liability for open inspection issues and potential enforcement actions from past violations; and responsibility for decontamination activities and decommissioning of the site. It is expected that recipients will review this notice, distribute it to responsible staff, and consider actions as appropriate, to ensure compliance with NRC requirements concerning the transfer of control of licensed activities. However, suggestions contained in this notice are not new NRC requirements; therefore, no written response is required.

Background

This information notice was originally issued to inform licensees of their responsibility to provide timely notification to NRC before the planned transfer of ownership or control of licensed activities and obtain prior written consent to such action from NRC, as specified in Title 10 of the Code of Federal Regulations, 10 CFR 30.34(b), 40.46, and 70.36. Specific guidance was also provided outlining the information to be submitted by licensees concerning changes of ownership or control resulting from mergers, buy-outs, or majority stock transfers.

Discussion

Section 30.34(b) states: "No license issued or granted pursuant to the regulations in this part, Parts 31 through 36, and 39, nor any right under a license shall be transferred, assigned or in any manner disposed of, either voluntarily or involuntarily, directly or indirectly, through transfer of

control of any license to any person, unless the Commission shall, after securing full information, find that the transfer is in accordance with the provisions of the Act and shall give its consent in writing." Similar regulations are contained in 10 CFR 40.46 and 70.36. Thus, the regulations are very clear that control of licenses cannot be transferred without prior written permission from the Commission.

Although it is not NRC's intent to interfere with the business decisions of licensees, it is necessary for licensees to provide timely notification to NRC whenever such decisions could involve changes in the corporate structure responsible for management oversight, control, or radiological safety of licensed materials. Full information on changes of ownership or control of licensed activities should be submitted to the appropriate NRC regional or Headquarters office, 90 days prior to the proposed action. The purpose of such notification is to allow NRC to assure that: (1) radioactive materials are possessed, used, owned, or controlled only by persons who have valid NRC licenses; (2) materials are properly handled and secured; (3) persons using such materials are capable, competent, and committed to implement appropriate radiological controls; (4) licensees provide adequate financial assurance for compliance with NRC requirements; and (5) public health and safety are not compromised by the use of such materials. Although the burden of notification is on the existing licensee, it may still be necessary for the transferee¹ to provide supporting information or to independently coordinate the change in ownership or control with the appropriate NRC office.

NRC licensees planning to transfer ownership, to change the corporate status, or to change control of licensed activities are required to provide sufficient prior notice and full information about the change to NRC, and to obtain written consent from the Commission before the transfer. Failure to comply with this requirement may adversely affect the public health and safety and interfere with NRC's ability to inspect licensed activities. Cases where change of ownership or control has occurred without prior written consent from NRC will be treated as noncompliance with the provisions of 10 CFR 30.34 (or the similar provisions of 10 CFR 40.46, and 70.36), and will be referred to the inspection staff and/or Office of Investigations, as appropriate. The failure to receive required NRC approval prior to a change in ownership or control of licensed activities is considered to be a Severity Level III violation and may warrant escalated enforcement action, to include civil penalties and orders,

¹A Transferee is an organization proposing purchase or otherwise gaining control of an NRC-licensed operation.

if indicated by the circumstances, against one or both of the parties involved. Willful failure to obtain prior NRC approval of the transfer may result in referrals to the Department of Justice for consideration of criminal prosecution.

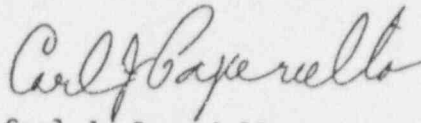

Licensees should note that a license cannot be sold or transferred by itself to a transferee. In situations where a licensed company is purchased in its entirety, and the transferor² will not continue in business as a separate entity, the purchase can be approved if the license is amended to reflect any name changes, compliance with financial assurance requirements, personnel changes, or any other change that would normally require an amendment. If there are no changes, an amendment may not be necessary and the transferee and transferor will be notified by letter that NRC has no objection to the sale, based on written statements from the transferee/transferor confirming that no changes in the licensed operation will occur as a result of the sale.

In cases where a licensed operation is purchased from a transferor, who continues in business as a separate entity (without the license), the transferee must submit an application for an amendment to the license to reflect the change in identity of the licensee, compliance with financial assurance requirements, and any other pertinent changes in the operation. The transferee can use the transferor's docketed documents as a basis for preparing the license amendment application. Usually a new license will not be issued. However, the transferee can always apply for a new license by providing a complete application. If a new license is issued, the transferor must request termination of its license as a separate action.

In order to maintain their availability, records important to the safe and effective decommissioning of the facility and all records concerning public dose and waste disposal need to be transferred to the new licensee or to NRC in cases of terminations. Therefore, no transfers or changes of ownership or license terminations will be authorized until all information or records concerning decommissioning of the facility, radiation doses to the public and waste disposal, such as releases to sewers, incineration, radioactive spills, and on-site burials, have been transferred to the new licensee, if licensed activities will continue at the same location, or to NRC for license terminations.

²A Transferor is an NRC licensee selling or otherwise giving up control of a licensed operation.

Attachment 1 outlines the information needed by the NRC to approve changes of ownership or control. This information notice requires no specific action nor written response. If you have any questions about the information in this notice, please contact the technical contact listed below or the appropriate regional office.

Attachments:

1. Information Needed for Change of Ownership
2. List of Recently Issued NMSS Information Notices
3. List of Recently Issued NRC Information Notices

INFORMATION NEEDED FOR CHANGE OF OWNERSHIP APPLICATION

The applicant should provide the following information concerning changes of ownership or control by the applicant (transferor and/or transferee, as appropriate):

1. The new name of the licensed organization. If there is no change, the licensee should so state.
Barnes-Jewish St. Peters Hospital, Inc.
2. The new licensee contact and telephone number(s) to facilitate communications.
No change - Carol Emsch 314/926-1163
3. Any changes in personnel having control over licensed activities (e.g., officers of a corporation) and any changes in personnel named in the license such as radiation safety officer, authorized users, or any other persons identified in previous license applications as responsible for radiation safety or use of licensed material. The licensee should include information concerning the qualifications, training, and responsibilities of new individuals.
No change
4. An indication of whether the transferor will remain in non-licensed business without the license.
No change
5. A complete, clear description of the transaction, including any transfer of stocks or assets, mergers, etc., so that legal counsel is able, when necessary, to differentiate between name changes and changes of ownership.
See attached
6. A complete description of any planned changes in organization, location, facility, equipment, or procedures (i.e., changes in operating or emergency procedures).
No change
7. A detailed description of any changes in the use, possession, location or storage of the licensed materials.
No change
8. Any changes in organization, location, facilities, equipment, procedures, or personnel that would require a license amendment even without the change of ownership.
No change
9. An indication of whether all surveillance items and records (e.g., calibrations, leak tests, surveys, inventories, and accountability requirements) will be current at the time of transfer. A description of the status of all surveillance requirements and records should also be provided.
No change, all current

10. Confirmation that all records concerning the safe and effective decommissioning of the facility, pursuant to 10 CFR 30.35(g); 40.36(f), 70.25(g), and 72.30(d); public dose; and waste disposal by release to sewers, incineration, radioactive material spills, and on-site burials, have been transferred to the new licensee, if licensed activities will continue at the same location, or to the NRC for license terminations. N/A
11. A description of the status of the facility. Specifically, the presence or absence of contamination should be documented. If contamination is present, will decontamination occur before transfer? If not, does the successor company agree to assume full liability for the decontamination of the facility or site? N/A
12. A description of any decontamination plans, including financial assurance arrangements of the transferee, as specified in 10 CFR 30.35, 40.36, and 70.25. This should include information about how the transferee and transferor propose to divide the transferor's assets, and responsibility for any cleanup needed at the time of transfer. N/A
13. Confirmation that the transferee agrees to abide by all commitments and representations previously made to NRC by the transferor. These include, but are not limited to: maintaining decommissioning records required by 10 CFR 30.35(y); implementing decontamination activities and decommissioning of the site; and completing corrective actions for open inspection items and enforcement actions. No change, will continue to abide
- With regard to contamination of facilities and equipment, the transferee should confirm, in writing, that it accepts full liability for the site, and should provide evidence of adequate resources to fund decommissioning; or the transferor should provide a commitment to decontaminate the facility before change of control or ownership.
- With regard to open inspection items, etc., the transferee should confirm, in writing, that it accepts full responsibility for open inspection items and/or any resulting enforcement actions; or the transferee proposes alternative measures for meeting the requirements; or the transferor provides a commitment to close out all such actions with NRC before license transfer.
14. Documentation that the transferor and transferee agree to the change in ownership or control of the licensed material and activity, and the conditions of transfer; and the transferee is made aware of all open inspection items and its responsibility for possible resulting enforcement actions. No change, no open issues

15. A commitment by the transferee to abide by all constraints, conditions, requirements, representations, and commitments identified in the existing license. If not, the transferee must provide a description of its program, to ensure compliance with the license and regulations.

Agreed

INFORMATION NEEDED FOR CHANGE OF OWNERSHIP APPLICATION

5. A complete, clear description of the transaction:

St. Peters Community Hospital, Inc. owns and operates Barnes St. Peters Hospital. The Shareholder of the corporation was Barnes Hospital. On January 31, 1996, Barnes Hospital merged into The Jewish Hospital of St. Louis. Subsequently, St. Peters Community Hospital, Inc. changed its name, effective April 29, 1996, to Barnes-Jewish St. Peters Hospital, Inc. The hospital remains under the control of this same corporation.

OCT 16 1996

SUBJECT: ACKNOWLEDGEMENT OF CORRESPONDENCE (Letter Dated 09/25/96)

Dear Licensee:

In response to your request, we have completed the initial processing, which is an administrative review of your application for a(n):

☐ New License ☒ Amendment ☐ Renewal

Administrative deficiencies were identified during this initial review as outlined below. However, it should be noted that a technical review may identify additional omissions in the submitted information.

It appears that your request is routine (see 1-3 below as applicable).

Incomplete information is as follows: In order for us to complete your amendment request to change the name of your company, a fee is required. Please contact our License Fee & Debt Collection Branch, located in our headquarters office, as referenced below, to obtain the correct fee amount.

1. New and amendment actions are normally processed within 90 days, unless we find major deficiencies, or policy issues requiring central program office assistance.
2. Renewal actions are normally processed within 180 days, however under timely filing (before expiration) you may continue to operate under your existing license.
3. Termination actions are normally processed within 90 days, unless confirmatory surveys following decontamination/decommissioning activities are involved.

A copy of your correspondence has been forwarded to our Licensing Fee and Debt Collection Branch (301/415-6097) for approval of the fee category and amount, if required.

If you have a compelling safety or business-related reason for requesting expedited review, please contact the Materials Licensing Branch at (630) 829-9887. We will try to complete your request as soon as practicable. Any correspondence about this request should reference the control number.
