Arlington, Texas 76011

Dear Ray:

I was pleased to learn that you are in good health and that your promised return to Tustin hadn't been deferred for a diminishment of interest in our progress. You are welcome any time.

I have enclosed a copy of our Quality Assurance Manual which was, of course, inspired by your visit last year. We have used the CFR50 outline but have taken the liberty to make it inclusive of medical product sterilization as well as radiation aging of nuclear components. Quality assurance is, and must be, inclusive of everything a company does.

I will be interested in learning your reaction to this and the various attachments I have included. Equally important, I will be pleased to see a more positive evaluation in the white book. Perhaps this must wait on your next audit but you may be certain that all elements are and have been in effect for some while.

You mentioned that you may be here in March or April. Just give us a short amount of notice so we can be certain of relatively few interruptions.

It was good talking to you again.

Best regards,

  
Wallace Hall  
General Manager
