Subject: CHANNEL 3 TONIGHT

Dear friends:

Don't forget to watch the Channel 3 news tonight at SIX. A brand new whistleblower comes forward and explains how NU and the NRC colluded on Millstone Unit 1 to allow the plant to violate regulations for almost 20 years. They even denied an exemption request yet allowed Millstone to restart. This new whistleblower is a member of NU's NUCLEAR SAFETY CONCERNS PROGRAM. Even the NRC was forced to admit this was a major safety issue.

Our dear friend Mr. Wayne Lanning and many other NRC officials knowingly allowed MP-1 to continue to operate even though there was a high probability of a Loss of Coolant Accident OUTSIDE THE CONTAINMENT. There were no back-up systems for this likely event.

Don't be surprised if you observe a different attitude WRT NU's PR.

This story should appear nationally tomorrow.
