

AUG 13 1985

Docket No. 50-293

Boston Edison Company M/C Nuclear
ATTN: Mr. William D. Harrington
Senior Vice President, Nuclear
800 Boylston Street
Boston, Massachusetts 02199

Subject: Annual Review of Boston Edison Quality Assurance Manual - (BEQAM)
Volume II

Reference: BECo Letter No. 85-121, From W. D. Harrington to T. E. Murley,
July 7, 1985, Subject: Annual Report of Changes to the Boston
Edison Quality Assurance Program Description

Dear Mr. Harrington:

We received the above referenced letter which transmitted a summary of twenty changes incorporated in BEQAM Volume II in accordance with the requirements of 10 CFR 50.54(a). The actual changes were forwarded to this office by means of Change Information Notice Transmittal Nos. 84-19 through 85-08. These changes included a revision to the Boston Edison organization to reflect the appointment of Vice President - Nuclear Operations, the use of Management Corrective Action Request to address process and policy issues requiring management involvement, and several minor changes to clarify program requirements and to reflect changes in documents and forms referenced in BEQAM Volume II.

The Region I staff reviewed the summary report and the actual changes provided in revisions to the BEQAM Volume II sections, as identified on page vii (Revision 37) of the manual and found these changes to be acceptable as they did not reduce the commitments of your previously approved Quality Assurance Program description.

The effectiveness of your QA Program implementation will continue to be the subject of routine regional inspections.

If you have any questions concerning the above, please contact R. W. Winters at 215-337-5244.

Sincerely,

Original Signed By:

Stewart D. Ebnetter, Director
Division of Reactor Safety
