

AUG 13 1985

Docket No. 50-412

Duquesne Light Company
ATTN: Mr. J. J. Carey
Vice President
Nuclear Group
Post Office Box 4
Shippingport, Pennsylvania 15077

Gentlemen:

Subject: Systematic Assessment of Licensee Performance (SALP) Report No. 50-412/85-99 and Your Reply Letter 2NRC-5-105 Dated July 19, 1985.

Thank you for your reply to SALP Report 50-412/85-99. In your letter, you summarized actions taken or planned to address the concerns identified in our letter of June 7, 1985.

Based on our discussions with you at the June 19, 1985 management meeting, we have revised the subject SALP Report to update information provided to us at that time concerning completion status of cable pulling, scheduling for the reactor coolant system and steam generator hydrostatic tests, and revised scheduling for the "Engineering Confirmation Program." This updated information is reflected in the revised SALP Report (Enclosure 1), but does not affect our assessment.

With regard to the current status of construction, we acknowledge the improving trends in those areas in which weaknesses were identified in the previous SALP Report. The initiatives that were implemented during this assessment period were effective, but I feel additional attention is required for problems identified in the electrical/instrumentation area. Region I staff has discussed these problems with you at a site meeting on July 12, 1985, and feels that the remaining electrical/instrumentation tasks have been properly addressed and scheduled for action. I urge you to provide the necessary management attention to assure that the resolution of these problems in the electrical/instrumentation area is expedited.

Your cooperation with us is appreciated.

Sincerely,

Original signed by
Thomas E. Murley
Thomas E. Murley
Regional Administrator
