

AUG 14 1985

Docket No. 50-333

Power Authority of the State of New York  
James A. FitzPatrick Nuclear Power Plant  
ATTN: Mr. Harold A. Glovier  
Resident Manager  
P. O. Box 41  
Lycoming, New York 13093

Gentlemen:

Subject: Inspection Report No. 50-333/85-13

This refers to the routine inspection conducted by W. Oliveira of this office on April 29 - May 3, 1985, at the James A. FitzPatrick Nuclear Power Plant, Scriba, New York of activities authorized by NRC License No. DPR-59 and to the discussions of our findings held by Dr. P. K. Eapen with yourself at the conclusion of the inspection.

Areas examined during this inspection are described in the NRC Region I Inspection Report which is enclosed with this letter. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector.

Within the scope of this inspection, no violations were identified. However, our inspectors noted that the actions you have initiated to address the concerns identified in NRC Operational Assessment Team Inspection (No. 50-333/82-24) were not completed as planned. Examples of these actions included the efforts to reduce the drawing revision back log as stated in JAFP letter 82-0869 dated August 6, 1982 and the efforts to revise Plant Standing Order No. 5 to provide better control for the plant drawings and technical manuals. Therefore, you are requested to review the status of the actions you have initiated in response to the concerns identified in NRC Inspection Report No. 50-333/82-24 and provide a written status report to this office within thirty days of the receipt of this letter.

The response requested by this letter is not subject to the clearance procedures of the office of Management and Budget as required by the Paperwork Reduction Act of 1980, PL 96-511.

Your cooperation with us in this matter is appreciated.

Sincerely,

Original Signed By:
