Docket No. 030-16098
Inquiry No. 85-01
License No. 20-19118-01

John D. Kinneman, Chief
Nuclear Materials Section A
U.S. Nuclear Regulatory Commission
Region 1
631 Park Avenue
King of Prussia, PA 19406

Dear Sir:

On February 15, 1984, Findley Research, Inc. which was located in Berkley, MA. was completely destroyed by fire including all corporate records and equipment.

The Perkin-Elmer, Model 330-0119 detector was destroyed along with its Nickel 63 source . As replacement of this equipment is not scheduled for the immediate future, we have allowed the present license to expire and will apply for a new license when new equipment is ordered.

This response was suggested by Mr. Frank Costello of your office. Should further information be required, we would be happy to comply.

Sincerely,

Richard M. Hoar
