Attn: Mr. Earl Wright

Gentlemen:

Re: Control #82626

Item 6(b) of our Application for Byproduct Material License  
should be corrected to read:

"Hewlett-Packard Linear EC Detector Model 18713A  
containing Hewlett-Packard Source #18713-80020  
(15 millicuries). A maximum of two cells, each  
containing 15 millicuries of Ni 63 to be possessed  
at any time."

I hope this answers the question you raised regarding this  
item in our telephone conversation today.

Sincerely,

David C. Kennedy  
Director of Environmental Laboratories
